

Asset Bank User Guide

October 2021

TABLE OF CONTENTS

Section 1

INTRODUCTION

- What's new?
- What is Asset Bank?
- Assets, images, or files?
- What is an asset?
- What is Metadata?
- What are Keywords?
- What are Attributes?
- Asset Bank - diagram
- Folders
- Filenames
- Why do I need to know any of this when I just want a picture?!

Section 2

THE MAIN TASKS IN ASSET BANK

- searching - 3 types: simple, expanded & advanced
- uploading – metadata page
- lightboxes
- approvals

Section 3

HOME PAGE

- Login
- Navigate page

SEARCH: THE THREE TYPES OF SEARCHES – SIMPLE, EXPANDED & ADVANCED

SIMPLE SEARCH QUERY

- Search query in search bar

EXPANDED SEARCH QUERY

- Search by specific terms
- Search by category
- Search by format
- Search by keywords from the master list
- Attributes & file content

ADVANCED SEARCH

- Search using search builder tool
- Search by clause
- Search form
- Keywords
- Metadata page
- Refine results

FILTER

- Filter tool
- By year, format table

BROWSE

- Folder structure
- Search at what is presented in folders
- Browse by keywords
- Browse by Popularity
- Download image
- Crop before download
- Preview

LIGHTBOX

- Setting up a Lightbox
- Place an asset into a lightbox
- Download an asset from a lightbox
- Share an asset to internal staff via lightbox
- Send assets to external staff via email
- Send assets to external staff via URL
- Edit assets before sharing
- Delete
- Manage lightboxes
- Publish lightboxes

APPROVE ITEMS

- Request approval
- Approve

UPDATE ITEMS

- Edit
- Batch
- Bulk update

UPLOAD

- How to upload a file to Asset Bank
- What information do I need to include?

SHORTCUTS

INTRODUCTION

WHAT'S NEW?

Internal settings

- what was the problem, what did I do to fix it, what will happen now that is an improvement

Keywords

- Increased from 399 to 2500, including clauses which are now searchable, 'Farm to Fork'

Metadata paragraphs – adding in contextual information

- Paragraphs for each scenario that can be copied over

Embedded file data

- Automatically grabs the file data so you don't need to input it all
- Strip file option button

Folders

- New folder structure

Filenames

- New filename convention used to populate keywords

Changes for users

New filenames

New contextual data paragraph to add in description box

New folder structure

More keywords to select

ASSET BANK (INTERNAL SETTINGS)

AB has so many internal settings and preferences that can be modified that unless there is a schema in place that aligns all the settings they will not necessarily sync. This is the problem that Compassion had up until now when users entered search queries, with the correct terms. AB found the files but had not been programmed to display the results. Many settings had been partially edited.

These settings have been reset and synchronised as part of a search-display process that is designed to simplify searches. It does this by searching for keywords first. Compassion is a language rich environment, and the images relate heavily to specific terms 'enriched' cages, 'slatted floors' that are specific to larger issues that Compassion responds to. By aligning all of this, I can identify terms, relate them to the keywords list, cross reference them, and then map them to practices and locations. These then map to documents, reports, policy, and legislation. Now, AB can see the entity relationships between the assets, and it has some internal mapping. This conceptually orientates us within AB so that we can identify how it uses its tools.

Diagram 1: Previous Asset Bank Internal mapping. Terms were not related and existed outside of an entity relationship framework

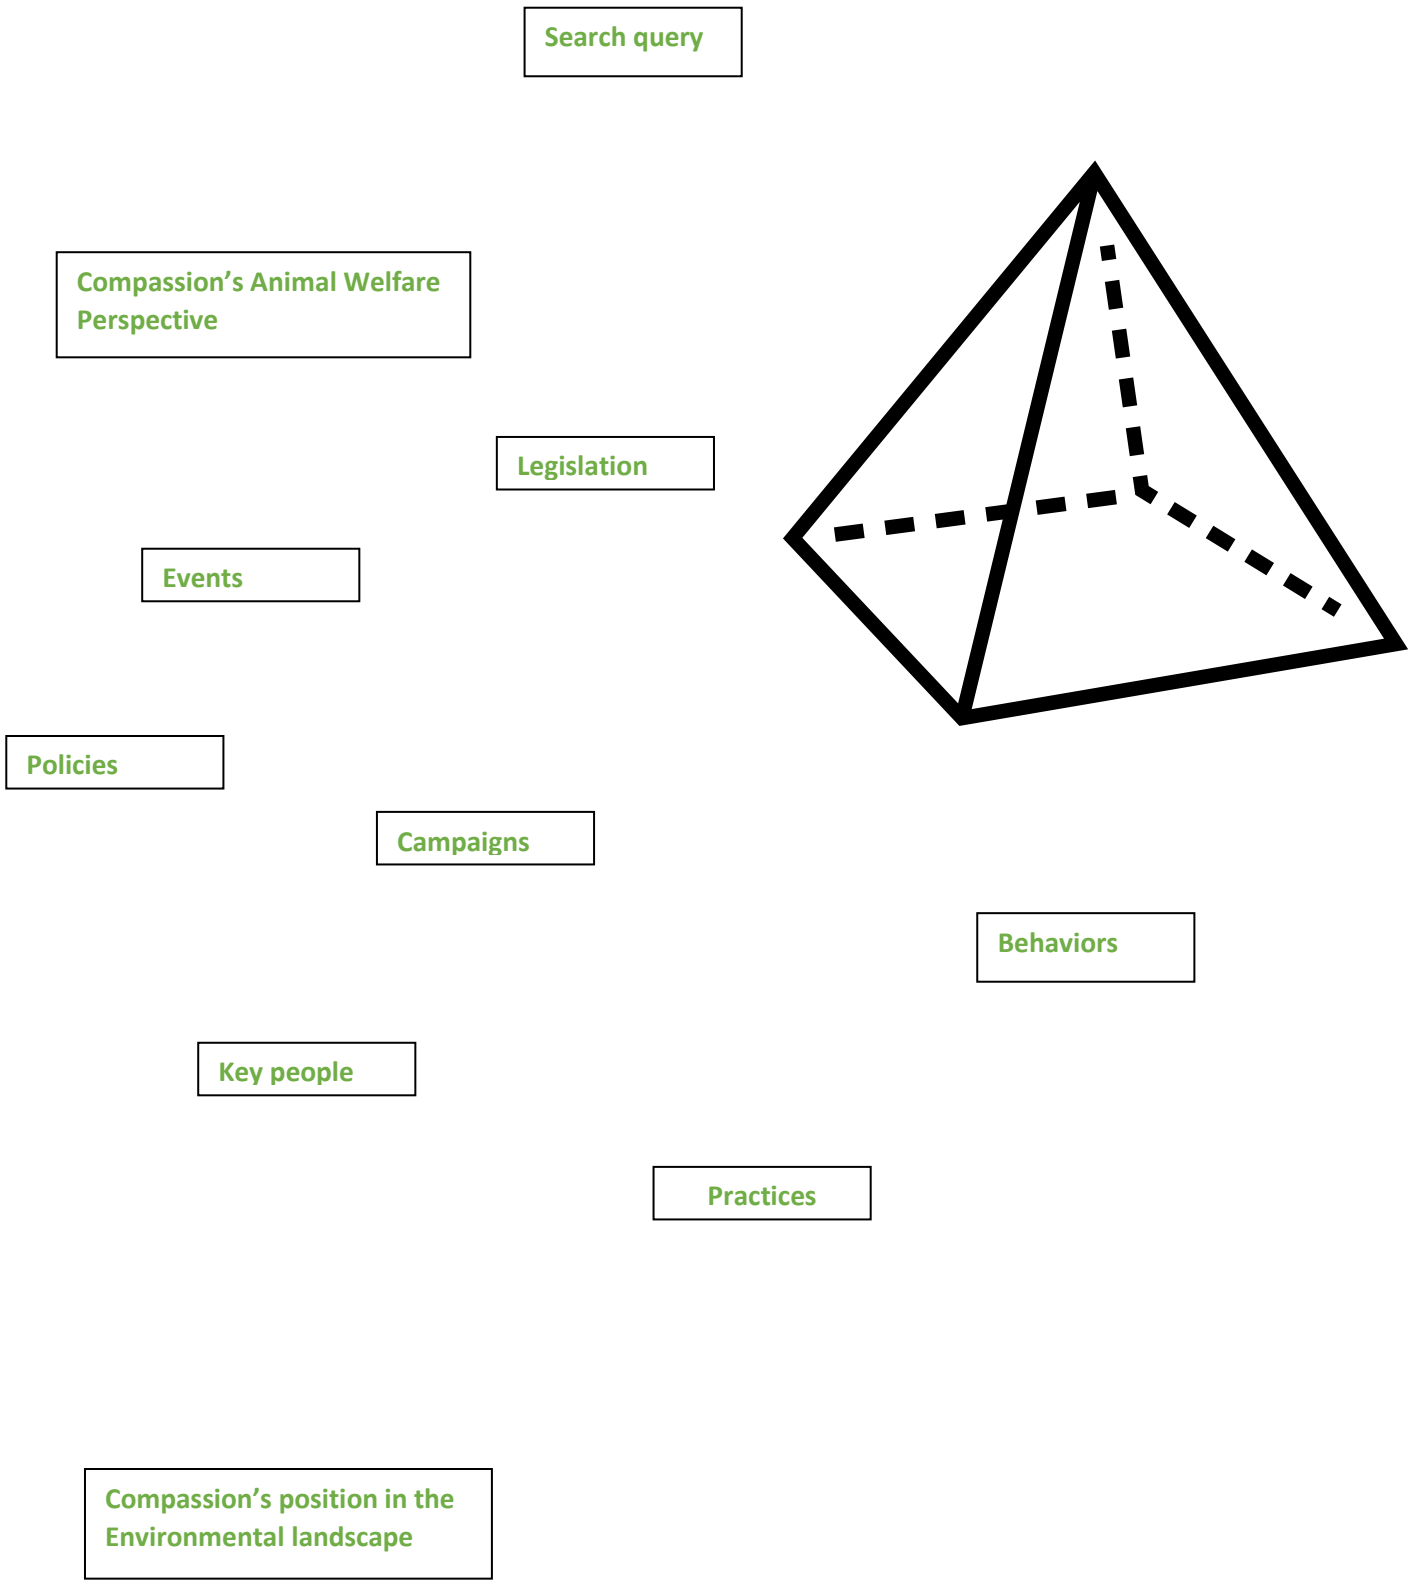

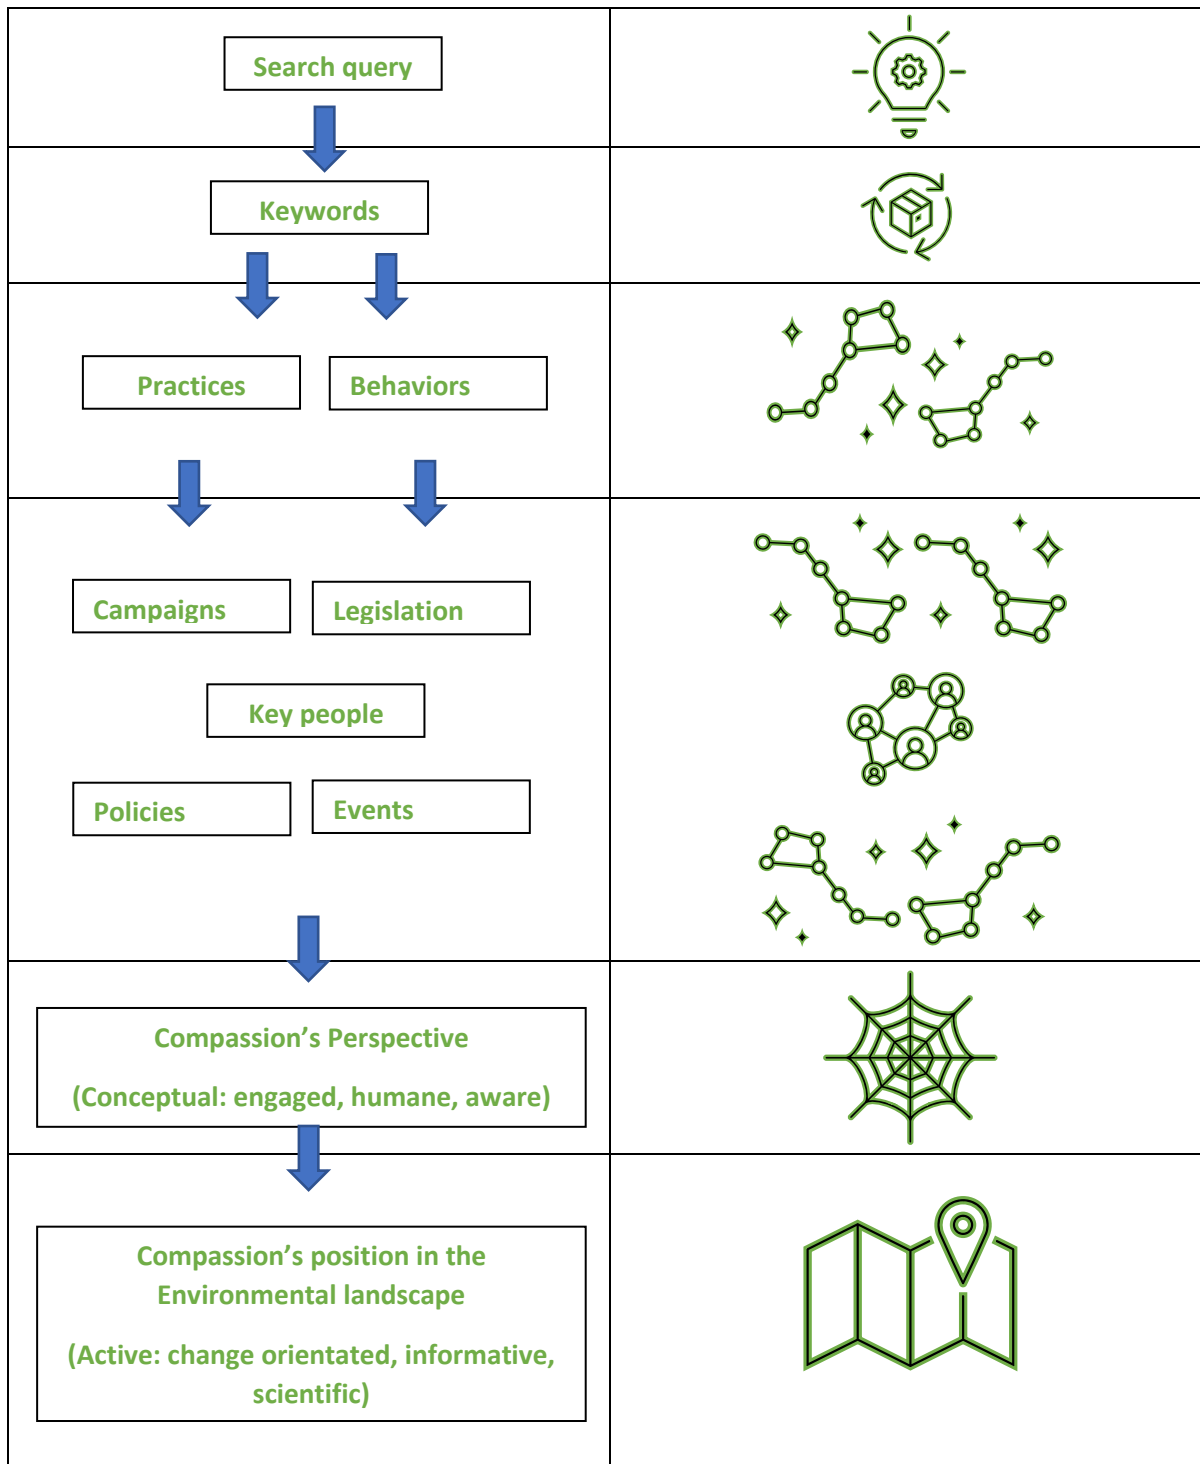

Diagram 2: Terms have been grouped into an entity relationship framework.

Search order sequence

<https://ciwf.assetbank-server.com/assetbank-ciwf/action/viewManageSortAttributes>

Sort Attribute	Sort Type	Reverse Sort?	Actions
Title	Alphanumeric or date	No	Up Down Edit Delete

Asset Type	Alphanumeric or date	No	Up Down Edit Delete
Resolution	Alphanumeric or date	No	Up Down Edit Delete
Folder	Alphanumeric or date	No	Up Down Edit Delete
Original Filename	Alphanumeric or date	No	Up Down Edit Delete

Browse Ordering

Sort Attribute	Sort Type	Reverse Sort?	Actions
Title	Alphanumeric or date	No	Up Down Edit Delete
Keywords	Alphanumeric or date	No	Up Down Edit Delete
Description	Alphanumeric or date	No	Up Down Edit Delete
ID	Numeric	Yes	Up Down Edit Delete
Resolution	Alphanumeric or date	No	Up Down Edit Delete
Asset Type	Alphanumeric or date	No	Up Down Edit Delete
Format	Alphanumeric or date	No	Up Down Edit Delete
Original Filename	Alphanumeric or date	No	Up Down Edit Delete

KEYWORDS

Increased from 399 to 2500, including clauses which are now searchable, 'Farm to Fork'
A full list of the keywords as an exportable file is available in Asset Bank.
It is possible to add keywords to this list <https://ciwf.assetbank-server.com/assetbank-ciwf/action/viewKeywordAdmin?categoryTypeId=3&attributeId=701>

CONTEXTUAL PARAGRAPHS

200 of the most used/searched for assets were selected and new 'contextual paragraphs' were added in the description boxes.

These paragraphs are available at the end of the user guide. They cover all the practices and legislation Compassion deal with and can be copied and pasted into the attribute page where necessary. They are a template to follow and a guide for when uploading new assets, so the paragraphs need to be modified.

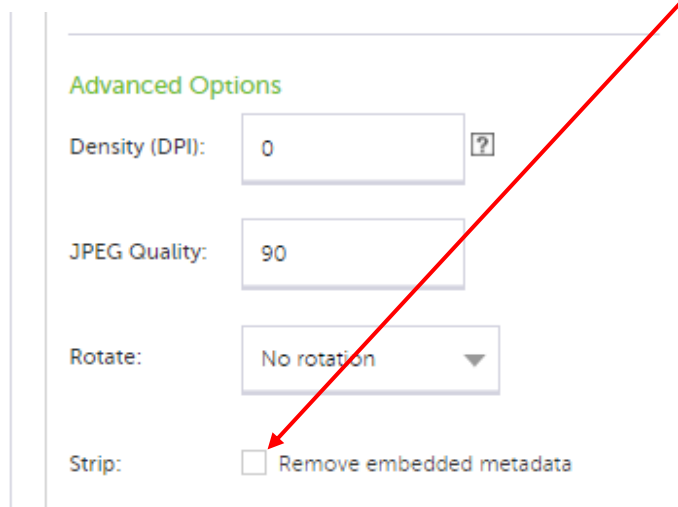

EMBEDDED FILE DATA

AB has an embedded file data option (called Embedded Metadata Mappings) that was disabled. From now onwards, this embedded file data option will be enabled on all uploads so that AB automatically extracts information from the asset. The kind of information it extracts is size of file, resolution, date, location and any other information the photographer has set. The user does not need to enter this information anymore.

Strip file option button

Activating the embedded file data option means that some files will have time stamps on them. There is a button that 'strips' this data off an image before sharing/sending.

Location: Download – advanced download – convert panel – advanced options

Advanced Options

Density (DPI): ?

JPEG Quality:

Rotate: ▼

Strip: Remove embedded metadata

Attribute	Embedded data type / value	Mapping Direction?
Orientation	[Other] / Auto-rotate from camera	Upload
Date Created	EXIF / DateTimeOriginal	Upload
Format	[Other] / Filename Extension	Upload
Resolution	[Other] / MAX(width,height)	Upload
Keywords	[Other] / Filename Extension	Upload
Photographer	[Any] / Keywords	Upload
Country	[Any] / Keywords	Upload

FOLDERS

There is a table at the end of the user guide that shows the old file path and new file path so that you can easily locate a folder that has been moved.

FILENAMES

New filename convention. AB generates its Title from the filename. The filename is the number from the camera plus format so 456.jpg or 0678.jpg. There is no information in this for AB so we need to create filenames that are meaningful in the Title tab.

The sequence for the filenames is **Animal_ / practice_ / country**

Example: **pig_tailbiting_UK.jpg**

This sequence should be adhered to as much as possible unless the file relates to a piece of legislation in which case, enter the legislation first

Legislation_ / animal_ / practice_ / country)

Example: **EUAct2017_tailbiting_france.jpg**

Filters

<https://ciwf.assetbank-server.com/assetbank-ciwf/action/viewManageFilters?type=1>

More filters can be added and it is possible to add category filters for example: 'Media' 'Campaigns'. A default filter can be set by admin.

FAQs

Example: I search for an image, use correct terms, and still get loads of text based documents (reports, magazine covers) in my results

Solution: Select Attributes only in the MORE tab

Search Asset Bank...

[SEARCH](#) [Advanced search](#)

What is Asset Bank?

A digital repository that Compassion uses to store images. Image files are dense and large so can take a long time to load and retrieve. AB does this quickly and accurately. It can only find what we ask it to find based on the terms we use to label our images.

Assets, images or files?

Asset Bank considers all files 'assets'. These could be document files- .doc, video files - mp4, audio files – mp3. Most of our files in Asset Bank are image files.

What is an asset?

An asset in Asset Bank is a digital object with unique features or "attributes". These attributes are known as the file metadata and they are measurable qualities such as the size of the file, the date the image was taken or the name of the photographer. Keywords associated with the file are also considered part of the metadata.

What is Metadata?

Metadata is data about data. It is the information that is unique to each file. In Asset Bank, all the metadata is on a file attached to each asset called the attribute page.

What are Keywords?

Keywords are terms that relate to the file in some way. They give users some idea of the file's content.

What are Attributes?

Attributes are the unique elements associated with each file. Asset Bank uses the term attributes to frame the information we need to input for each file.

Why do I need to know any of this when I just want a picture?!

Good question! Other users need to find pictures you may upload and understanding a little bit about how Asset Bank works may help you when you search for a file.

The main tasks with Asset Bank are

SEARCH

There are 3 types of searches available in Asset Bank: simple search, expanded search and advanced search. A simple search uses the minimum of terms to find the asset. Expanded and advanced searches use keywords, clauses, and the file metadata to find the asset.

UPLOAD

Files need to be uploaded into Asset Bank. Each file has an attribute page attached to it with sections to fill in. It is crucial that these sections are filled in as fully as possible as the information entered here helps Asset Bank differentiate amongst the files.

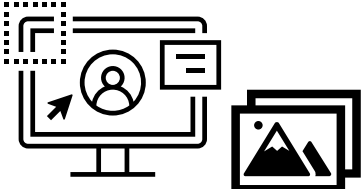

LIGHTBOX

Files can be shared with other people via the lightbox feature.

APPROVAL

Some files require approval before they can be downloaded. A 'REQUEST APPROVAL' box will appear on the asset page. If you click the box, an email is sent to the designated approver who will respond in accordance with the policy attached to that asset.

HOW ASSET BANK SEARCHES FOR ASSETS

<p>ASSET BANK</p> <p>Asset Bank is used to store all of Compassion’s images (assets)</p>	
<p>SEARCH</p> <p>To find an image, enter your search term in the search bar</p>	
<p>KEYWORDS</p> <p>Asset Bank has been set to search by TITLE first, then KEYWORDS</p>	
<p>ASSET</p> <p>It will show you all files that match the terms in your search query with TITLES in its database, followed by all matching KEYWORDS, then all other matching metadata</p>	
<p>SEARCH</p> <p>If the file you require does not appear in any of the results, you can narrow your search using the asset’s METADATA</p>	
<p>METADATA</p> <p>Metadata is all the data about the asset that has been entered into Asset Bank. It might be the photographer’s name, the country the asset relates to, the size of the file. Each different piece of information is called an ATTRIBUTE.</p>	
<p>ATTRIBUTE PAGE</p> <p>All the metadata is filed on to a page called the ATTRIBUTE page. There is an Attribute page attached to each asset. Asset Bank searches through all the attributes on the attribute page to match any information with your search query</p> <p style="text-align: center;">ALL the attributes & the keywords = METADATA</p>

SEARCH

SEARCH QUERY

SEARCH BAR

Where it says 'Search Asset Bank...' enter your search query.

It could be 'pigs' or 'organic pigs at Worthy Farm' depending on how much information you have and how specific you want the results to be.

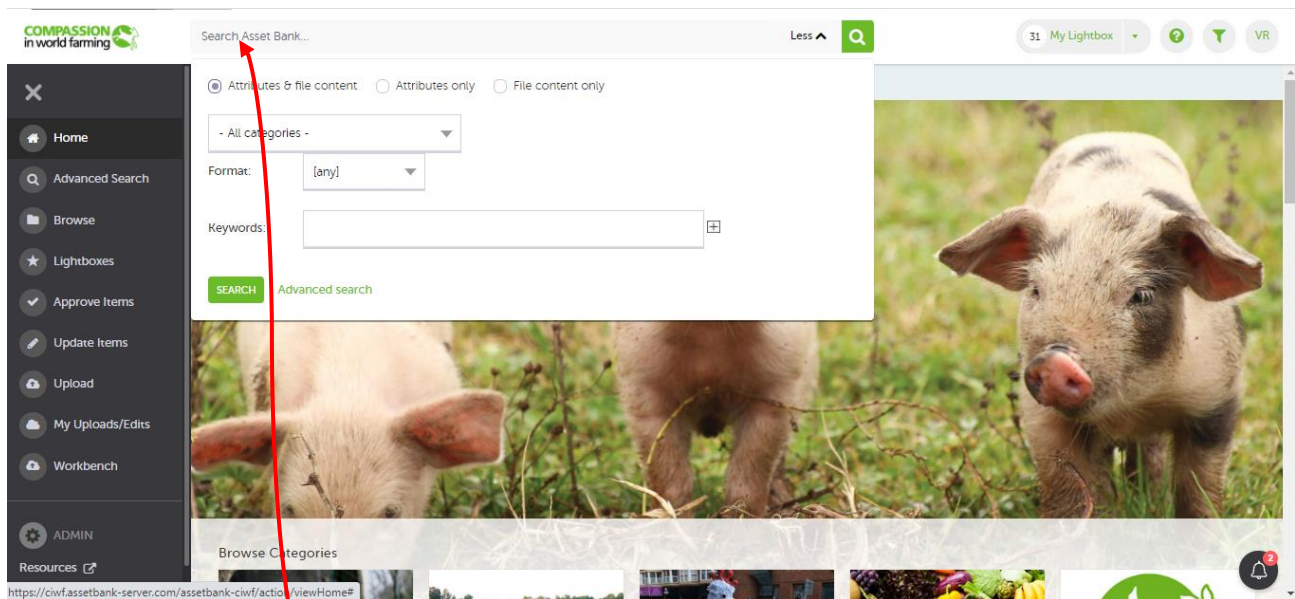

Click on the magnifying glass icon to start the search

Asset Bank will search all its files for any that match your search query.

On the right-hand side of the search bar is the **MORE** option. Click on the green downward arrow next to it to access the expanded search menu

USING EXPANDED SEARCH

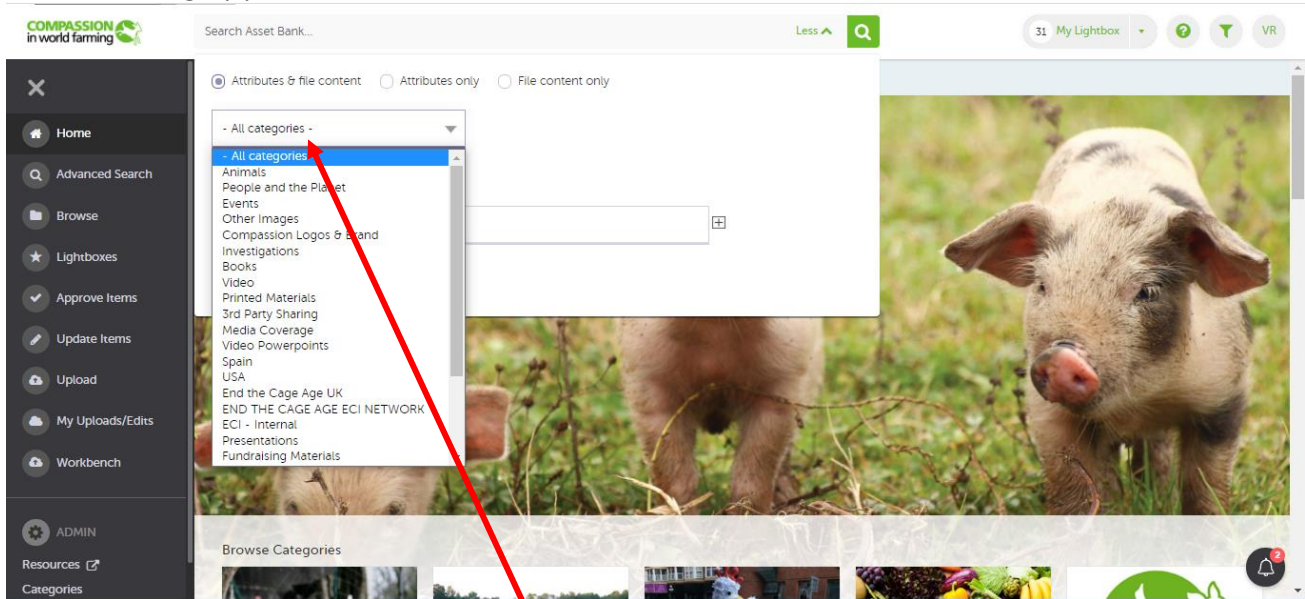

Enter Search query here.

Clicking on the categories & format tabs brings up a dropdown menu of options to select. Clicking on keywords allows you to enter any keywords related to your search query

CLICK Search when ready

CATEGORIES

Select the category you want to search

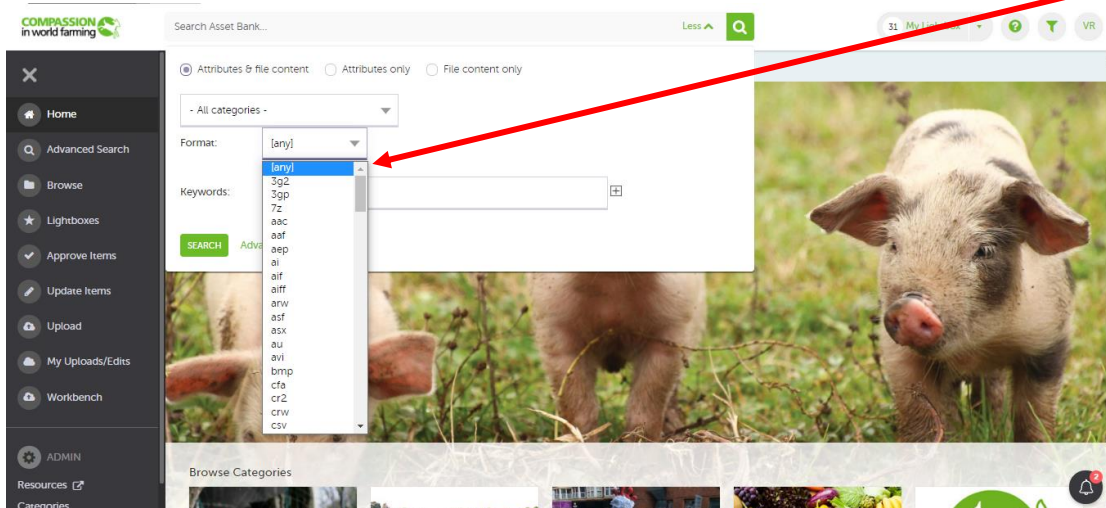

However, you can perform additional tasks to give Asset Bank more information to increase the chance of a more precise result.

There is a sub folder dropdown option for 'categories'. This allows you to search particular folders or sub folders to save time. Once you have entered your search query, click on the category dropdown box and select the category you want to search.

FORMAT

Select the format you want to find (only useful if you know the exact format of the asset) else click any or leave on default

KEYWORD MASTER LIST

Attributes & file content Attributes only File content only

- All categories -

Format: [any]

Keywords: +

[Advanced search](#)

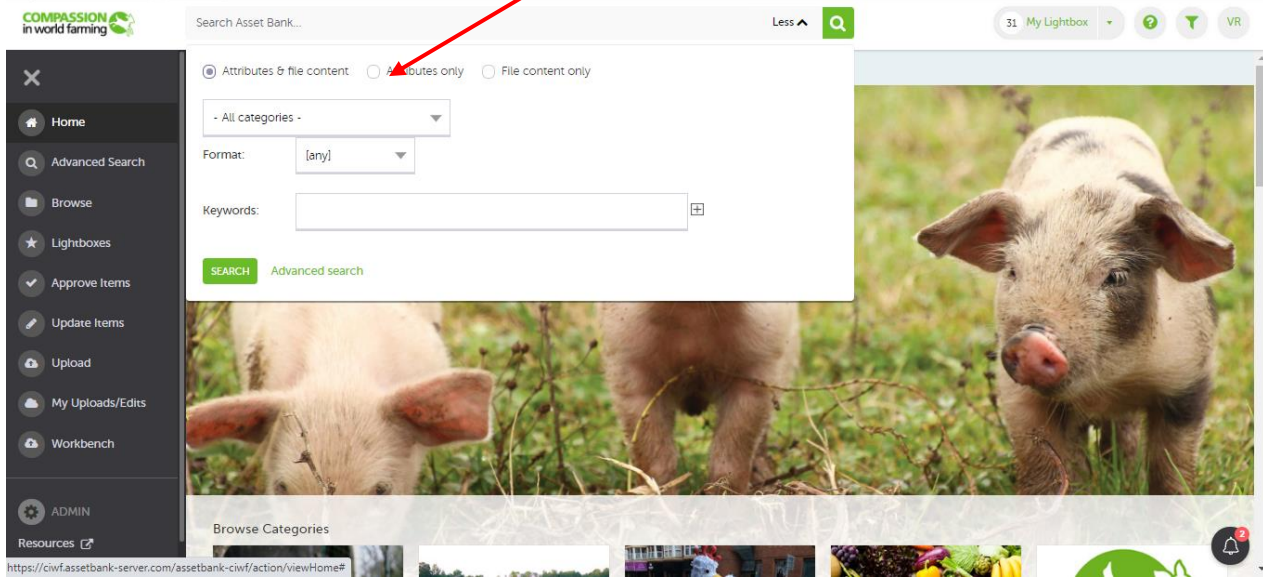

Clicking the plus + sign at the end of the Keywords tab brings up the keyword master list (all the keywords in the database). You can select as many terms as possible from here and they will be added to your search.

The screenshot shows a web browser window displaying the 'Keyword Chooser - ALL' interface. The interface includes a navigation menu on the left with options like Home, Advanced, Browse, Lightbox, Approve, Update, Upload, My Uploads, and Workben. The main content area features a search filter and a table of keywords.

Keyword	Synonyms	Uses	
2011		20	[Add]
2014		52	[Add]
40th Anniversary		1938	[Add]
abattoir		226	[Add]
Aberdeen angus		0	[Add]
Africa		10	[Add]
agricultural show		32	[Add]
agriculture		0	[Add]
alamy		4	[Add]
animal welfare		338	[Add]
Anna Roberts		41	[Add]
annual review		55	[Add]
antibiotics		99	[Add]
Argentina		370	[Add]
artificial insemination	insemination	13	[Add]

The interface also includes a 'Browse Categories' section at the bottom with various category thumbnails.

ATTRIBUTES & FILE CONTENT

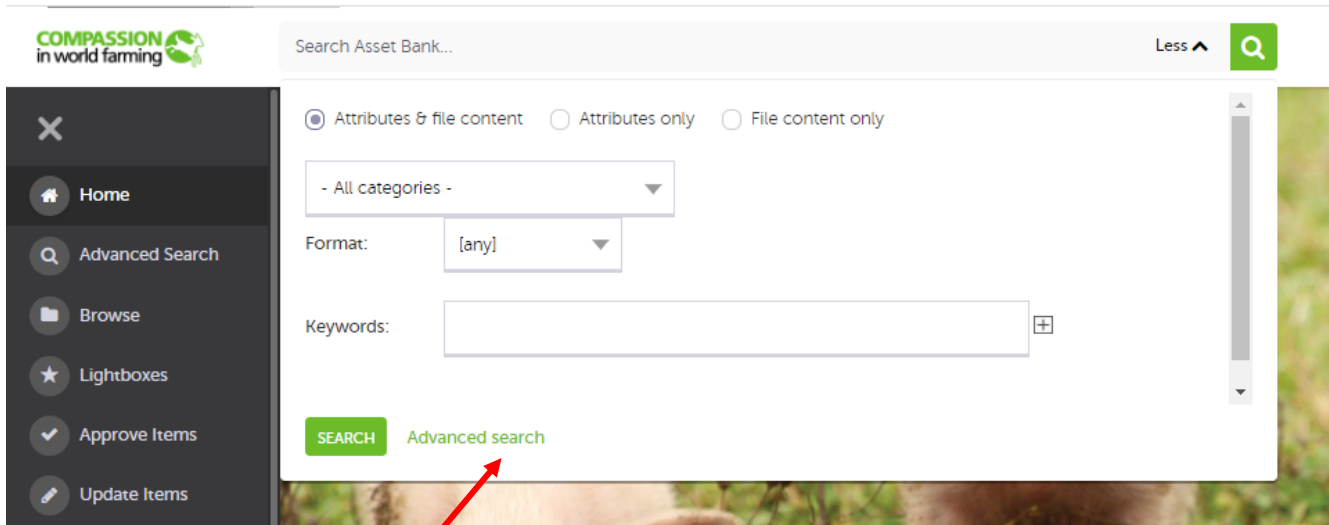

The default option is Attributes & file content but if you are looking for a textual document (report, magazine, newspaper article) that has some transcription and you know a phrase that appears in the document or a slogan relating to an asset, then you can click 'File content only'.

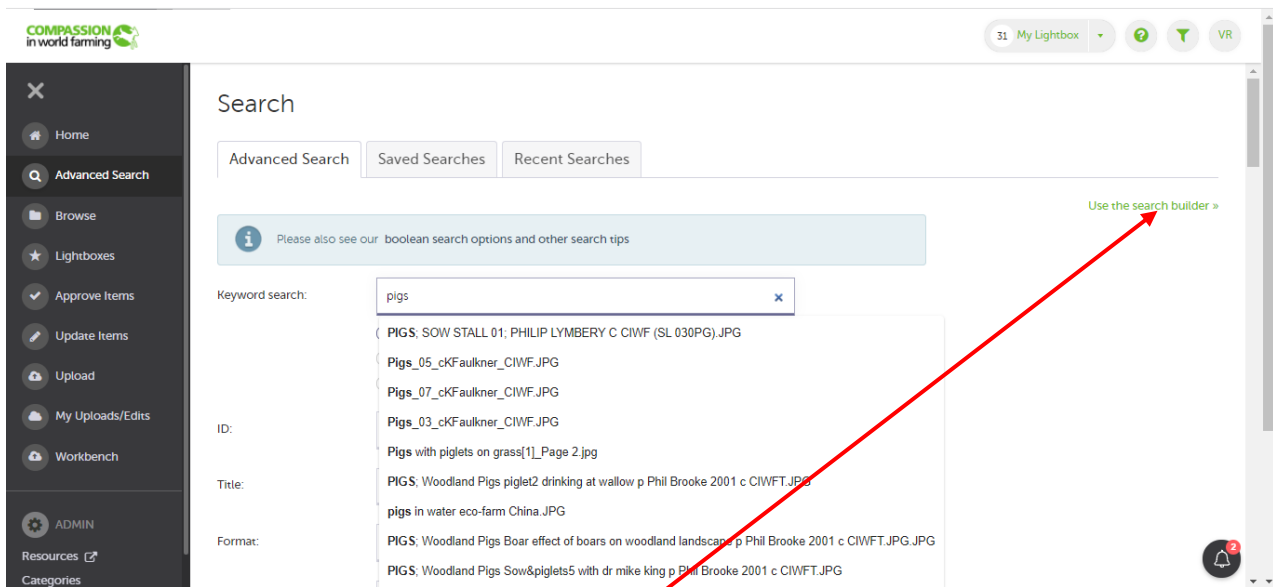

For images, always use Attributes & file content or Attributes

ADVANCED SEARCH

USING ADVANCED SEARCH

CLICK here to use the Advanced search feature

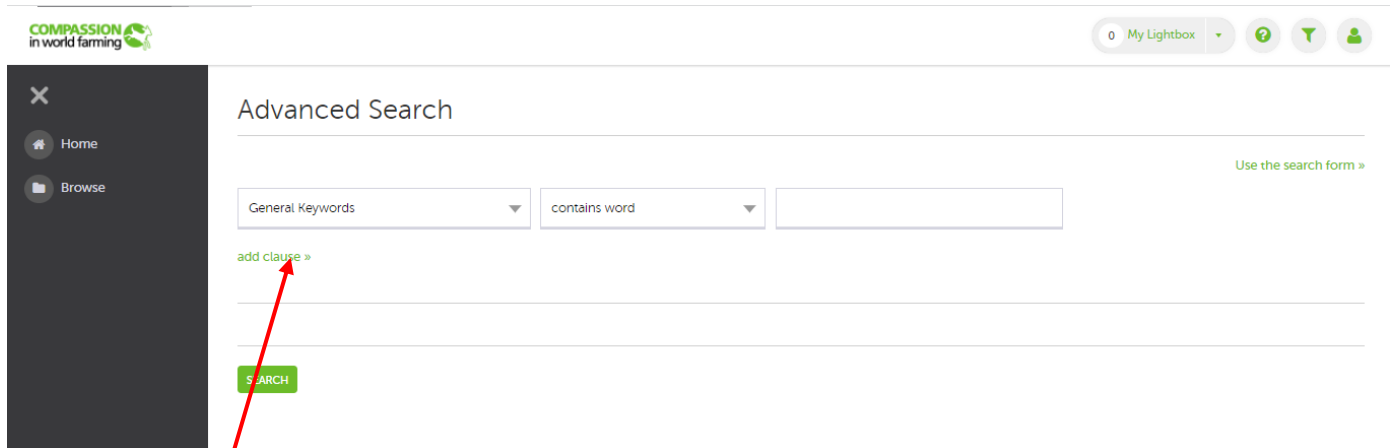

Ignore the blue bar that offers Boolean search options unless you are confident with Boolean logic 😊

You can also use the **search builder** – a tool in Asset bank that gives you the option to add as little or as much as you want to a search (useful when you know a very specific term relating to an asset).

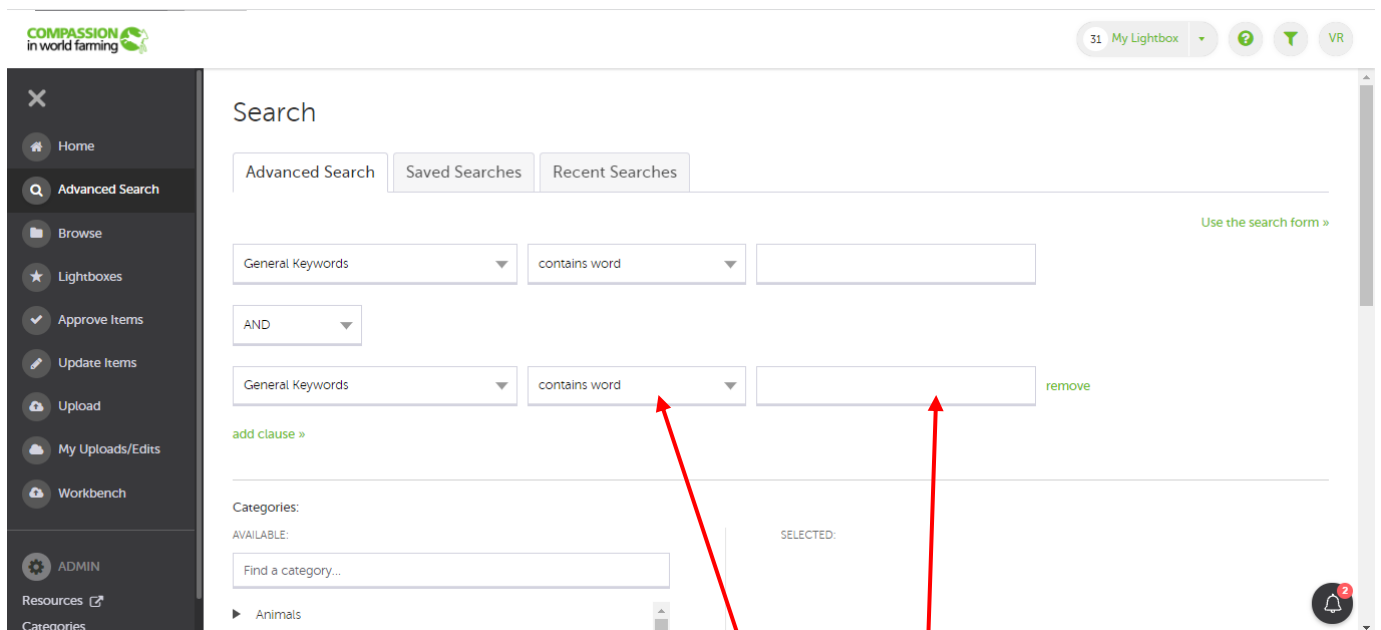

SEARCH BUILDER

Here you have options to enter general keywords and to narrow your search by using more specific terms.

ADDING CLAUSES

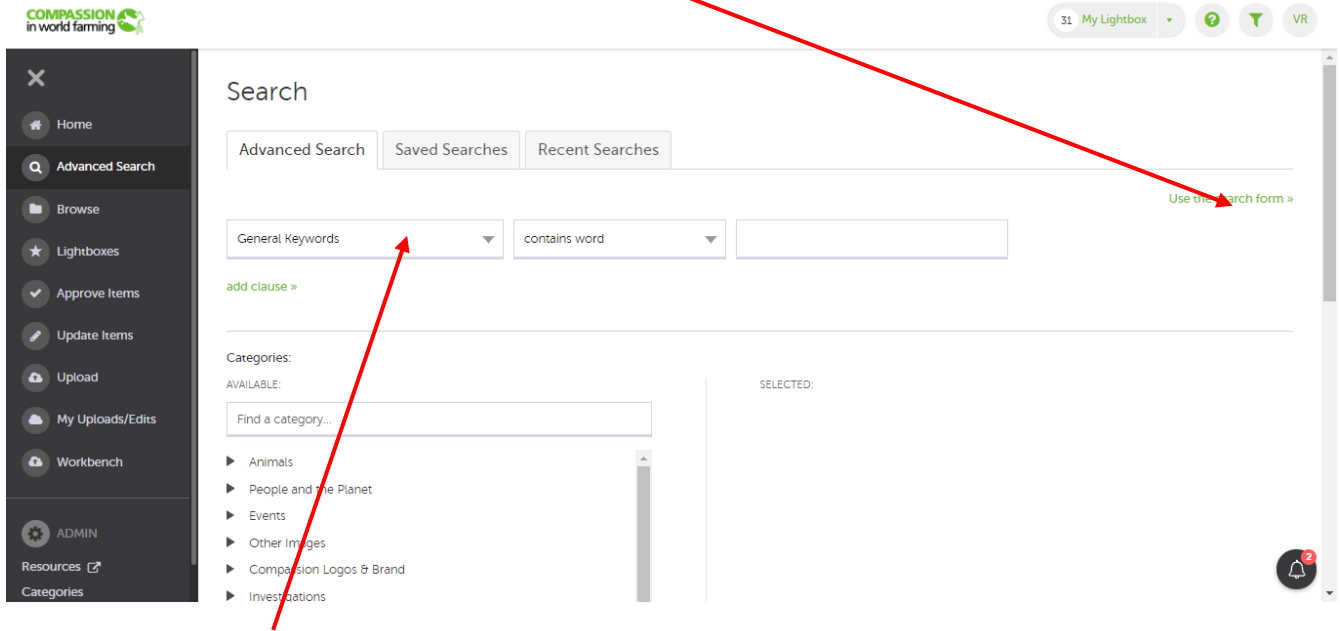

There is also an option to add a 'clause' so, if you are looking for a particular asset that has a phrase associated with it, click here.

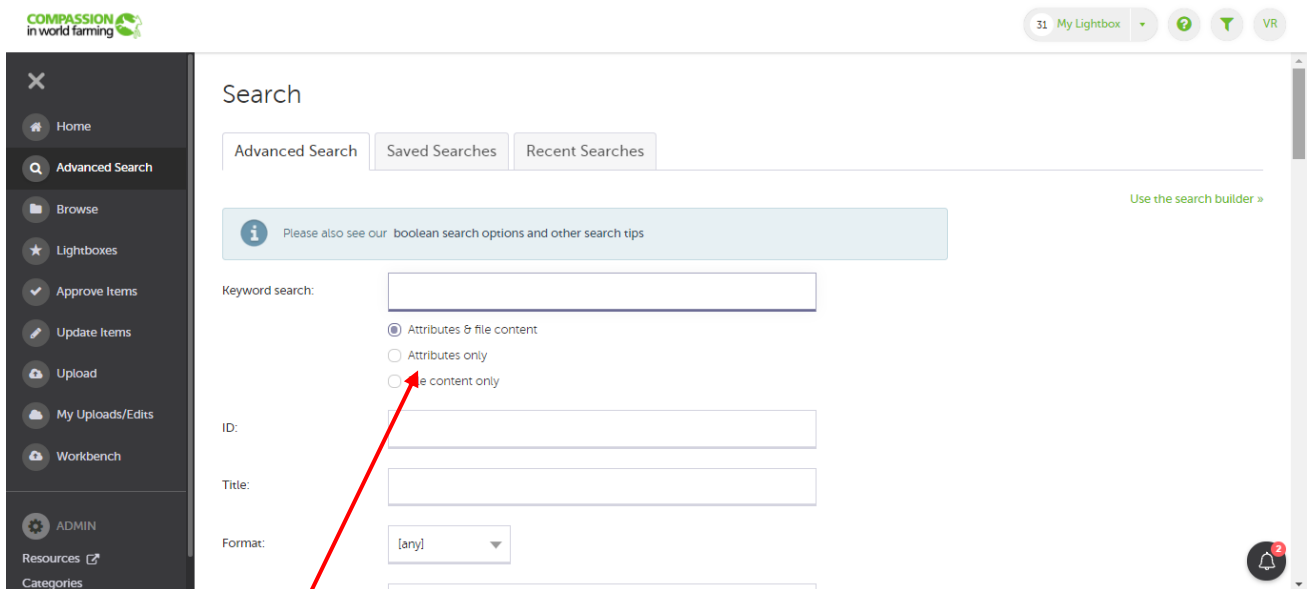

Once you have clicked 'ADD CLAUSE', more options to enter keywords and phrases (clauses) appear.

SEARCH FORM

Using the search form does the same thing – it gives you space to enter any information you have about the asset that can help Asset Bank find it.

KEYWORD SEARCH

If you are looking for a report, magazine or textual document and know terms that appear in the document then click 'File content only'. If not, always use the default setting of Attributes & file content.

You can search by other information associated with an asset. Details about the photographer, resolution, size, country, description can all be entered in the sections that follow.

METADATA (ATTRIBUTE PAGE)

The screenshot shows the metadata form with the following fields and options:

- Format: [any]
- Description: [text input]
- Conditions of Use: [any]
- Country: [any]
- Show more details: [any]
- Keywords: [text input] with a plus icon to the right.
- Size: between [text input] KB and [text input] KB
- Contact for information: [any]
- Photographer: [any]

Red arrows point to the plus icon on the Keywords field and the bottom right corner of the form area.

Enter any information you have here if it is specific – for example, the photographer’s name tab has a dropdown menu, and you can select from any of Compassion’s photographers.

Description: [text input]

The description tab is the place to add a description of the image but also the place to include any contextual data. For example: a particular practice that we are campaigning to ban, or a behaviour that relates to an ongoing concern.

The screenshot shows the metadata form with the following fields and options:

- Photographer: [any]
- Date Added: between dd/mm/yyyy and dd/mm/yyyy
- Date Taken: between dd/mm/yyyy and dd/mm/yyyy
- Asset Type: [any]
- Original Filename: [text input]
- Resolution: [any]
- Completeness: [any]

BROWSE

BROWSING FOLDERS

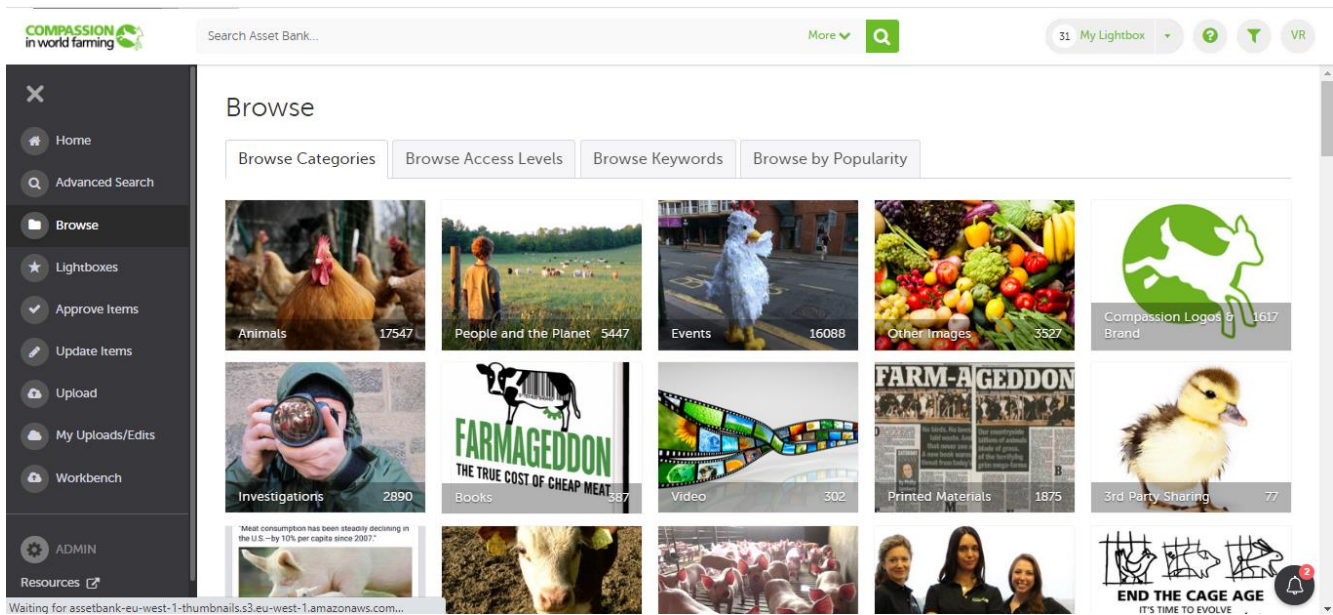

The BROWSE section is designed for users to search by images rather than terms. Compassion's assets have been organized into folders that you can browse directly.

NEW FOLDER STRUCTURE

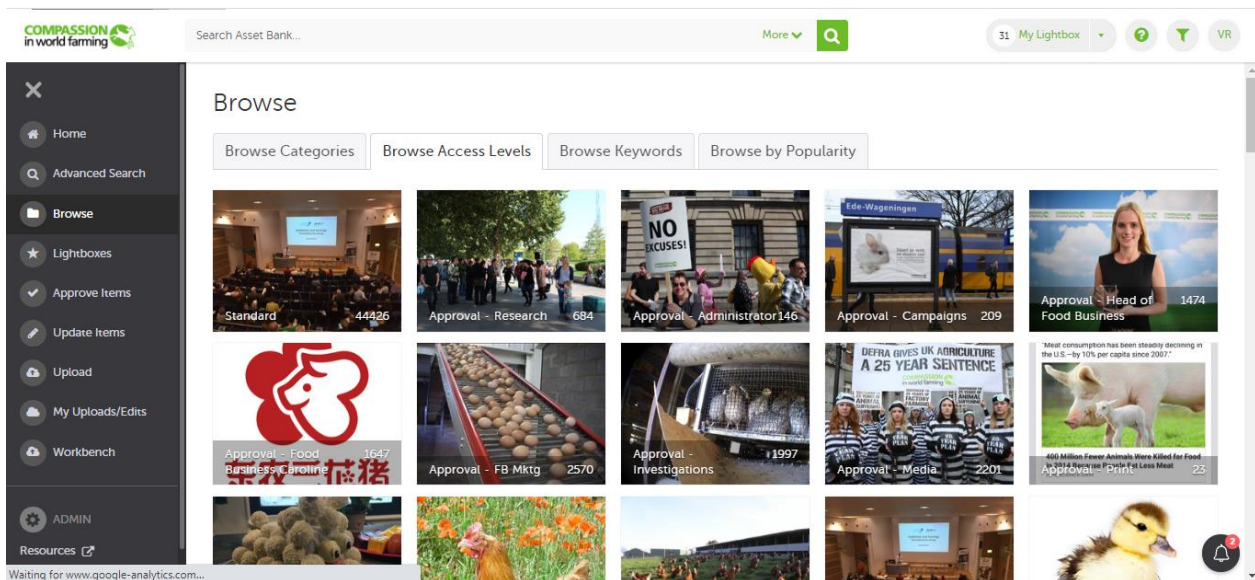

BROWSE OPTIONS

Click into the folder that matches your search query or search by option

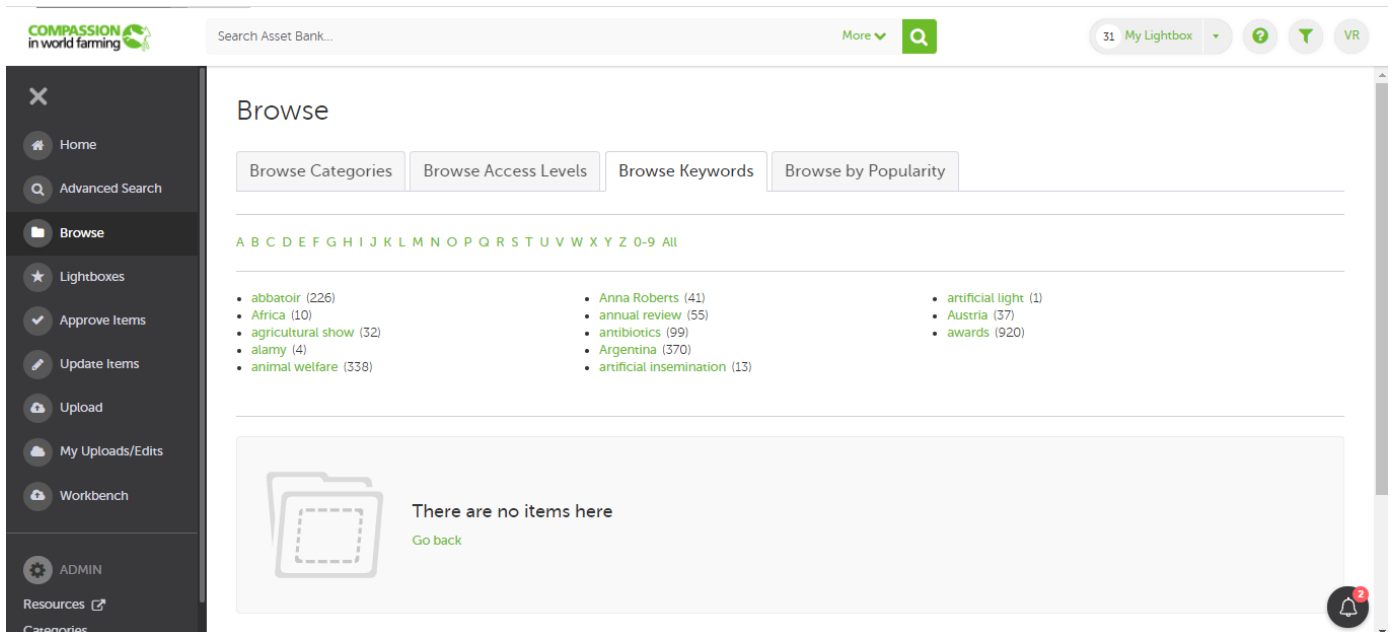

Users can browse 4 ways: by categories, access levels, keywords, popularity

Browse

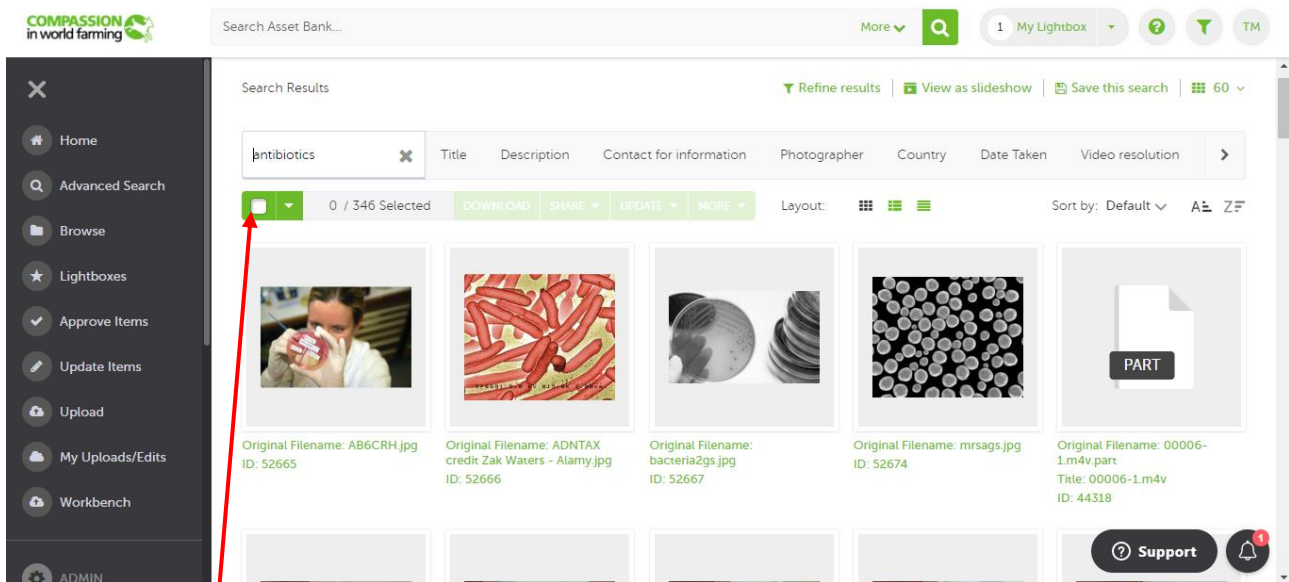

KEYWORD BROWSE

Browsing by [Keywords](#) is the preferable option for Compassion users as Asset Bank has been set to search by Keywords first.

Clicking on the Keywords tab brings up the Keywords master list, in alphabetical order. Users can select as many of these terms as necessary.

Example: I selected the term 'antibiotics' in keywords
Here are the results:

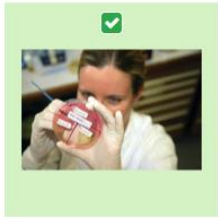

Click in the green box above any of the assets you want to select.

© Asset Bank 2021
[Accessibility Statement](#)
[Terms & Conditions](#)
[Privacy Policy](#)
[About](#)
[Contact Us](#)

If you select many files, Asset Bank will compress them into a zip file. If you cannot unzip files on your computer, return to the previous page and download each item individually.

DOWNLOAD ASSET

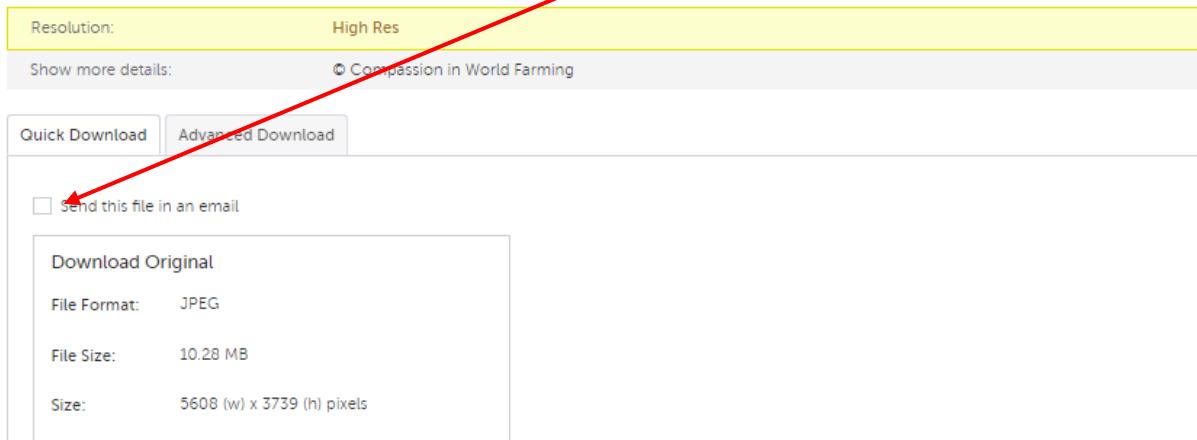

To unzip a file, you need to extract the files to a place on your desktop. Any user with MS Office can unzip files. Right Click on zip folder, click extract, select location on PC, and then open extracted files folder to view files.

Compressing files and sending them via a zip folder does not change the files – it ‘compresses’ the information in the file so that it is smaller to send, then restores the information once it has been received.

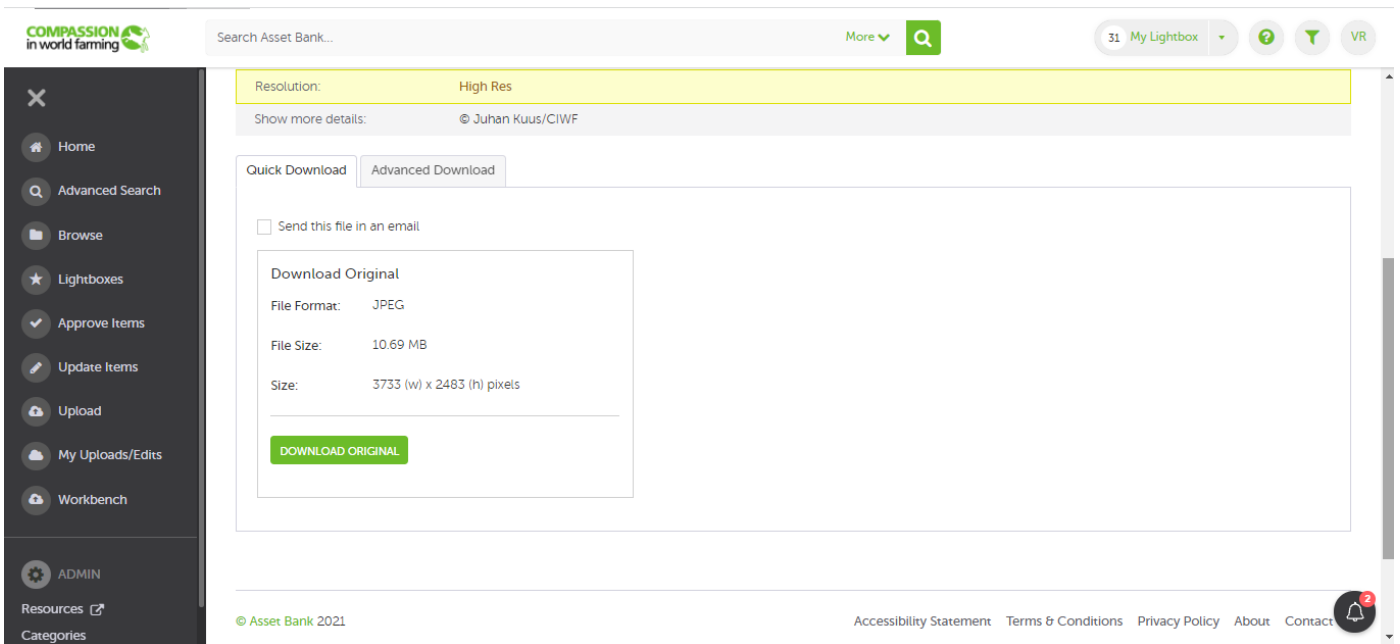

Downloading Images

Users can download directly to their own desktop but can also send the downloaded asset directly in an email

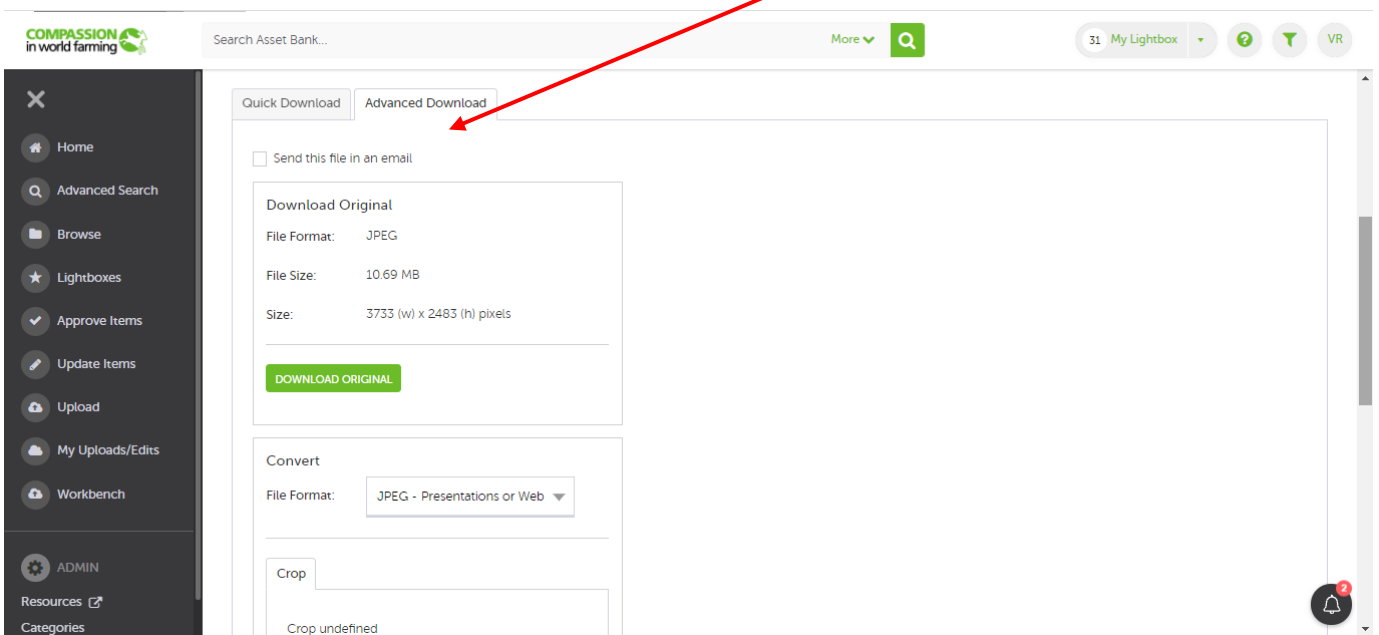

52665

There is a quick download option (download the file as it is to your desktop) and an advanced download option where you can change the size of the asset before you download it or crop the image so that you only download part of the asset.

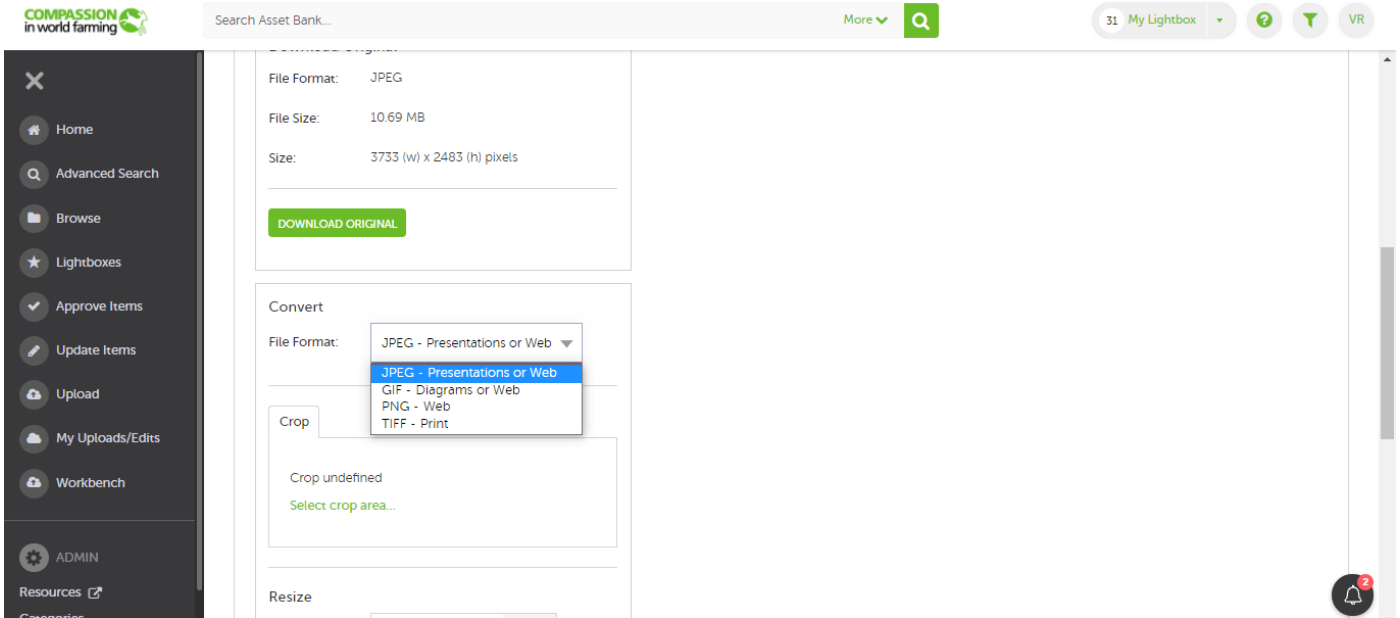

To perform an Advanced download, click on the Advanced download tab

Select a particular format to download JPEG, GIF, PNG, TIFF

Unless there is a particular reason you have for selecting the GIF, PNG or TIFF options, select JPEG. A useful guide to image formats is <https://matthews.sites.wfu.edu/misc/graphics/formats/formats.html>

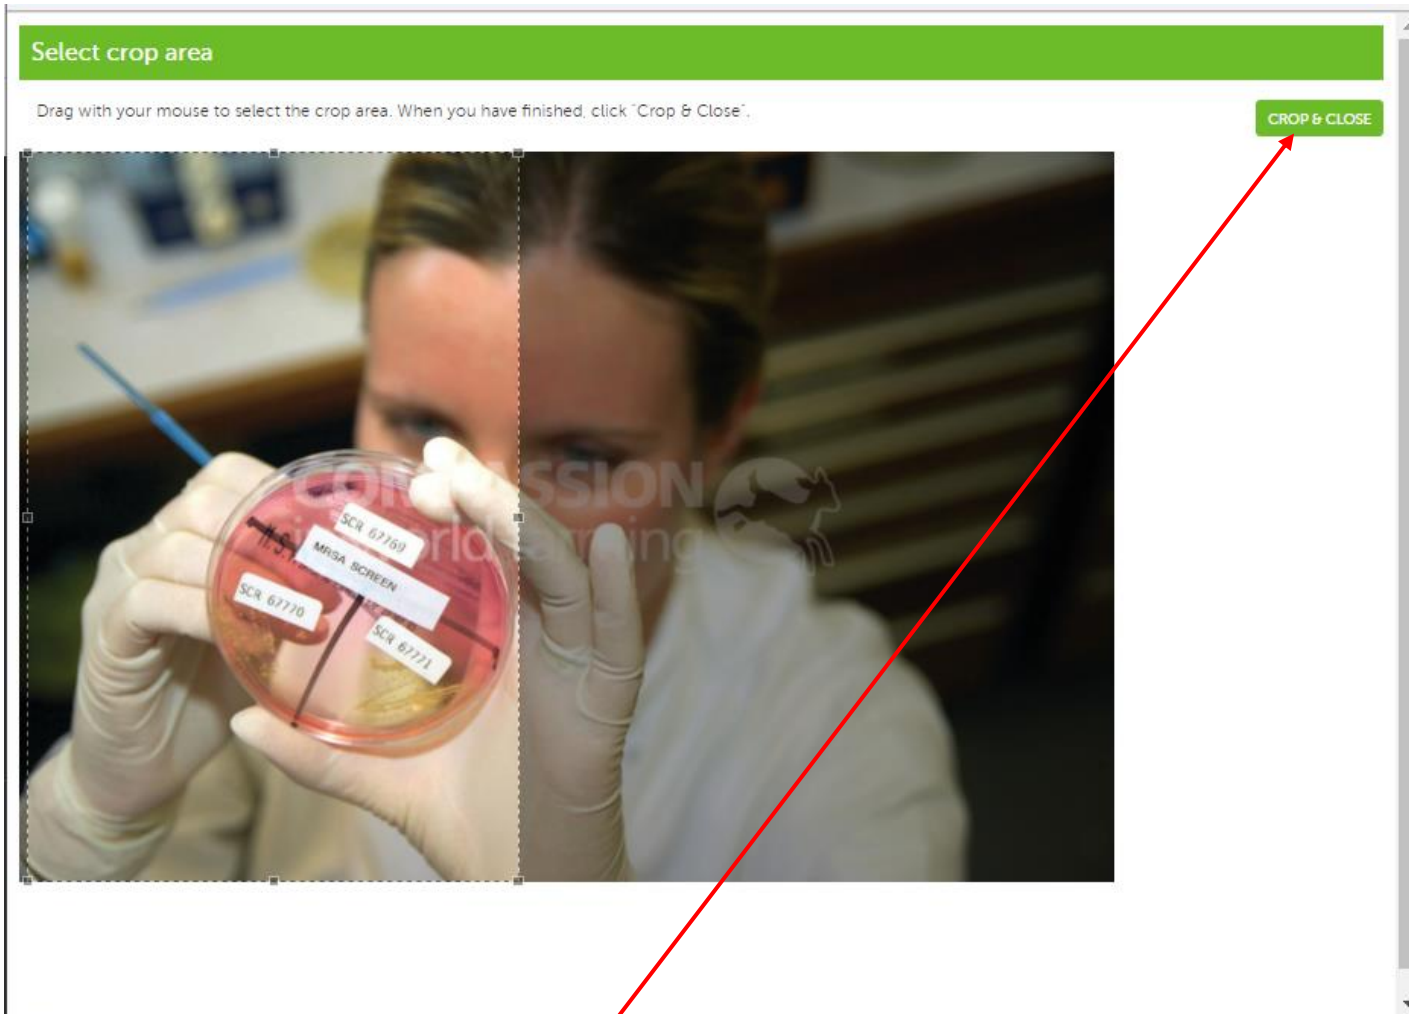

CROPPING ASSETS

Click Select crop area
An image window will open

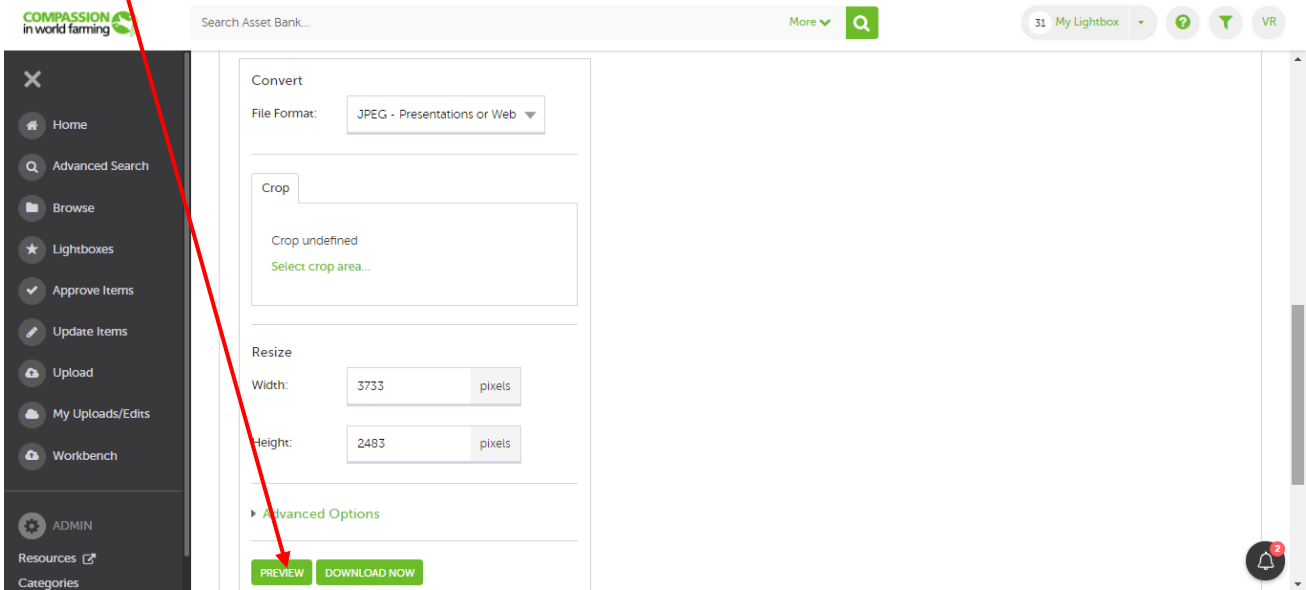

A cross **+** will appear on the image. Position the cross where you want the crop to start and slide the cross over the parts of the image you want to select.

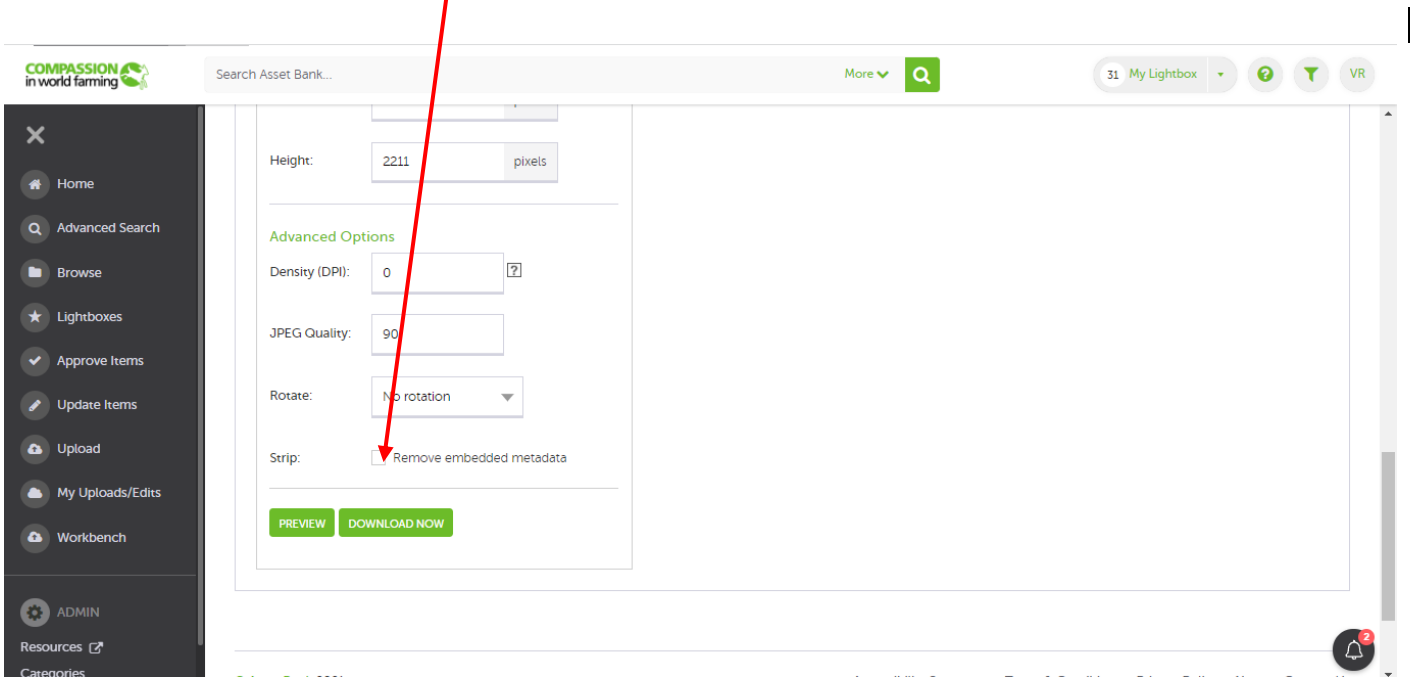

Click CROP and CLOSE to confirm selected area

The Resize option is here

PREVIEW

Click on advanced options only if you need to rotate the image. Leave the JPEG Quality at default and Density at 0. At present, we do not have embedded metadata on our files but will in the future. If an image has a time stamp on it that you want to remove, then tick the 'strip' box to remove the embedded date. For anything else, leave unticked.

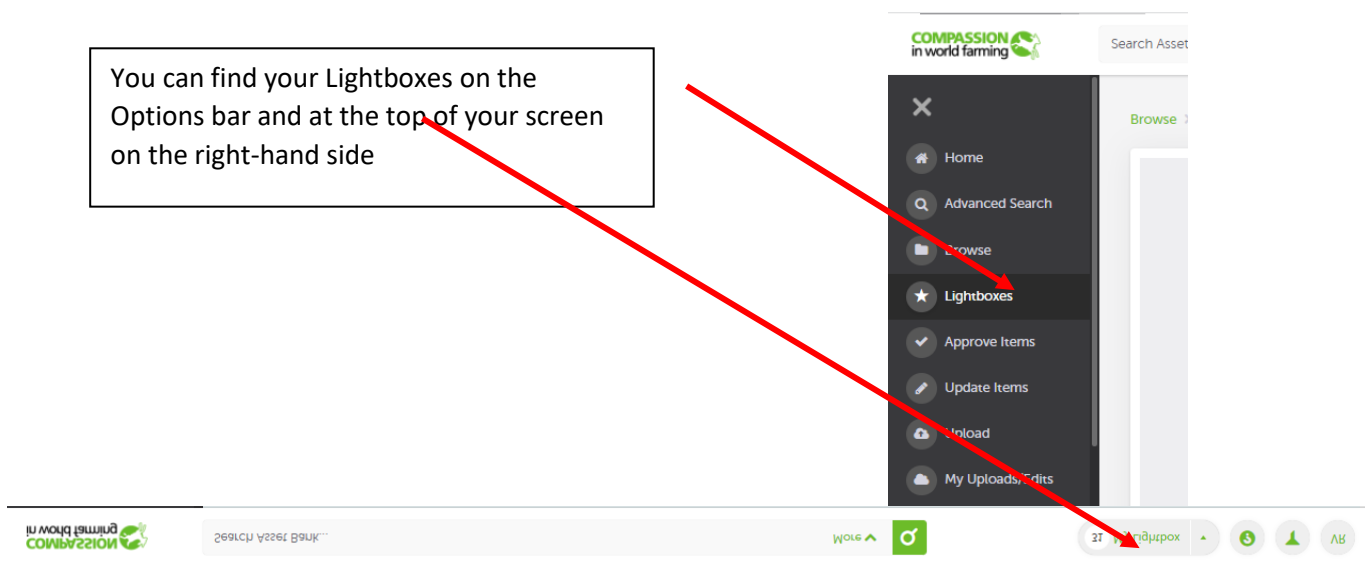

LIGHTBOX

Lightboxes are used to send large files via email or links to internal & external personnel. Users can 'share' a file via a lightbox and the recipient can download the file directly to their computer. Large files, particularly image files, need to be sent this way as they have so much information in them that they cannot be easily compressed without losing some of this information. High resolution images are used for printing, low resolution is adequate for web. Typical values are:

70 dpi = low res = web
300 dpi = high res = print

You can find your Lightboxes on the Options bar and at the top of your screen on the right-hand side

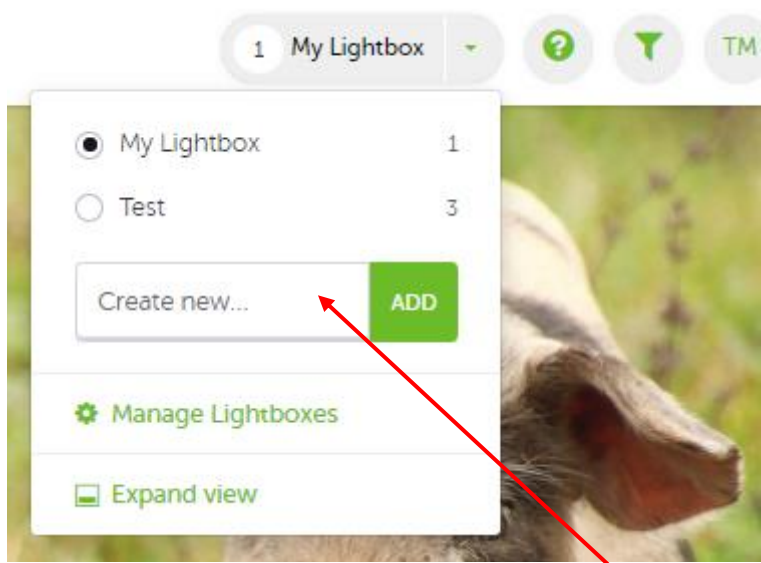

SETTING UP A LIGHTBOX

Click MY LIGHTBOX in filter bar at top of screen on right-hand side

A dropdown menu will appear

Enter name of new Lightbox in the Create new search bar and Click **ADD**

Pigs eating Cake	ADD
------------------	-----

Your Lightbox has been created and should now appear in the dropdown menu

ADD AN ASSET TO LIGHTBOX

Click the circle to the left of the Lightbox name and a black inner circle should appear.

<input type="radio"/> Pigs	0
<input checked="" type="radio"/> Pigs eating Cake	0
<input type="radio"/> Test	3

Create new...	ADD
---------------	-----

[Manage Lightboxes](#)

[Expand view](#)

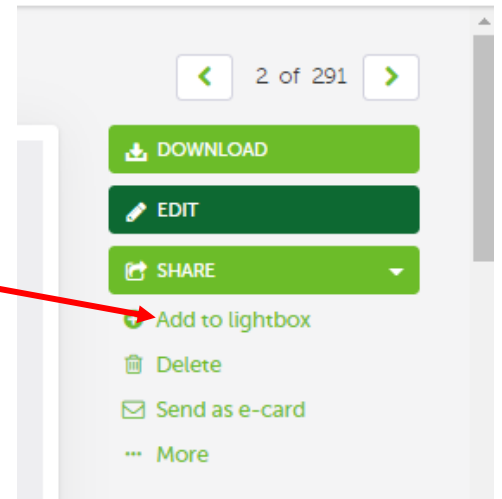

Any assets you add to a Lightbox will now go to this particular Lightbox. To send assets to another Lightbox, just select the circle to the left of the Lightbox name and click in it. Adding an asset to a Lightbox

Once you have found the image you want to send via a lightbox, click on [Add to lightbox](#).

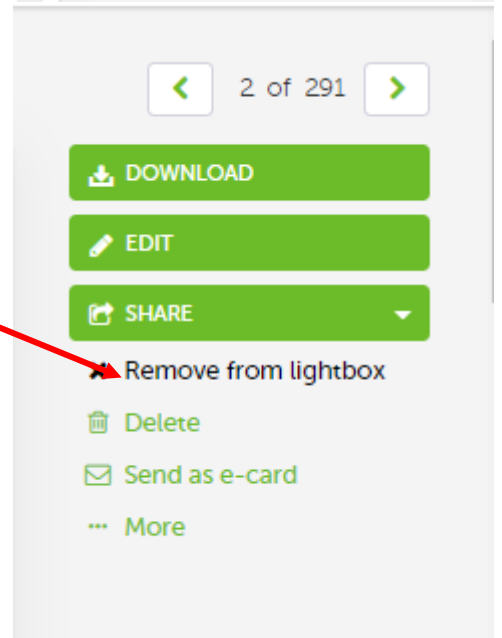

Can't see it?

On the right-hand side of the screen, you can see 3 green tabs and 4 further options.

Click on **Add to lightbox**

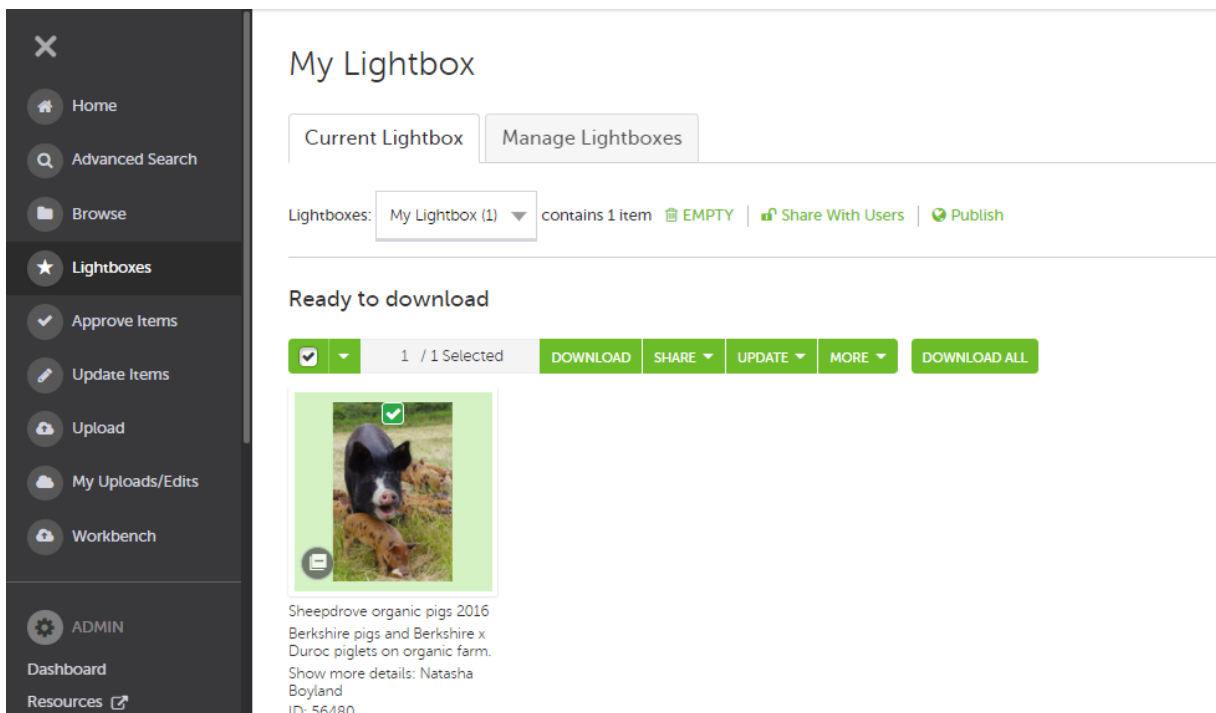

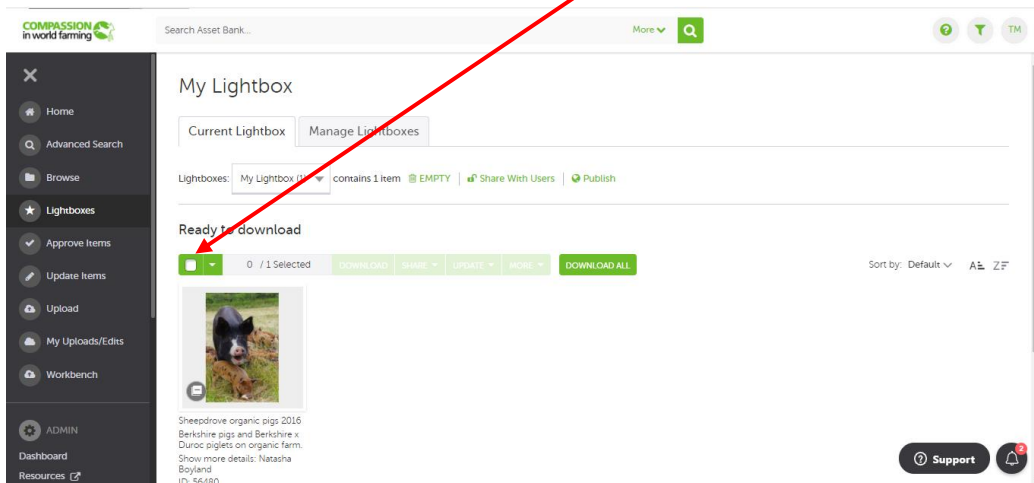

Add to lightbox changes to **X Remove from lightbox**

DOWNLOADING AN ASSET

Select the asset in the Lightbox by clicking on the green box above it

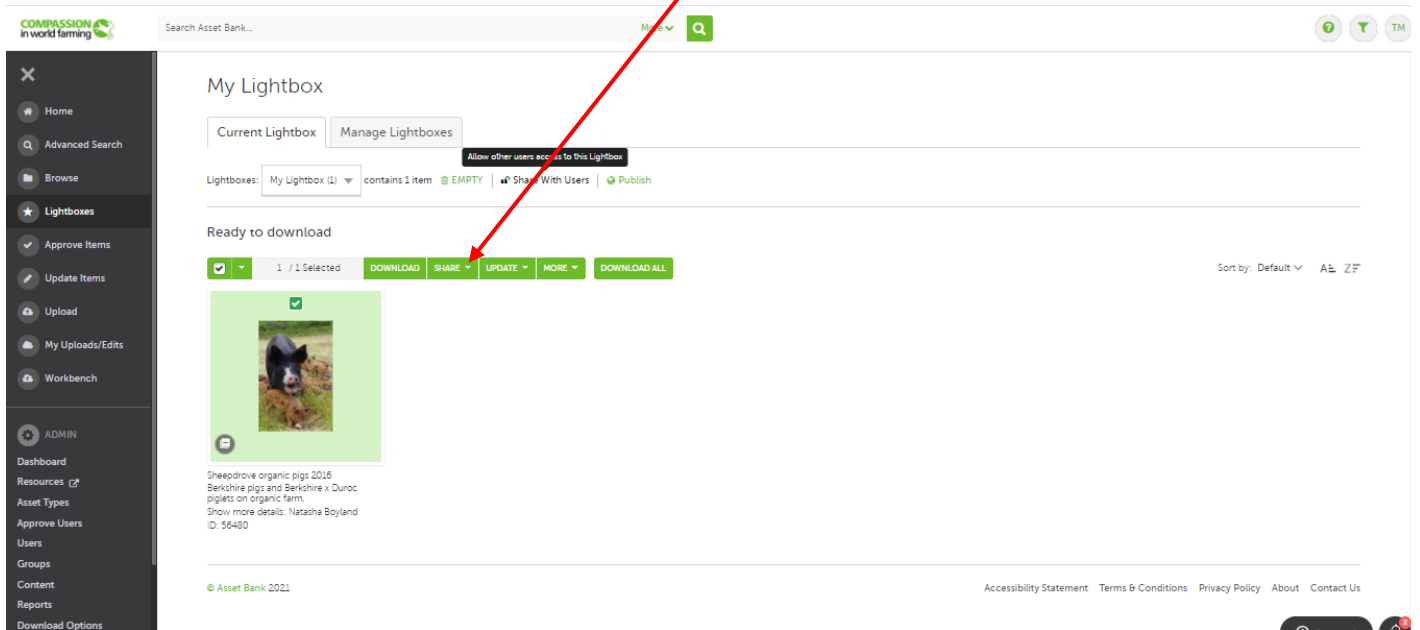

SHARE THE LIGHTBOX

To share the Lightbox with an internal member of Compassion, click Share with Users next to the lock icon. It will turn black once clicked.

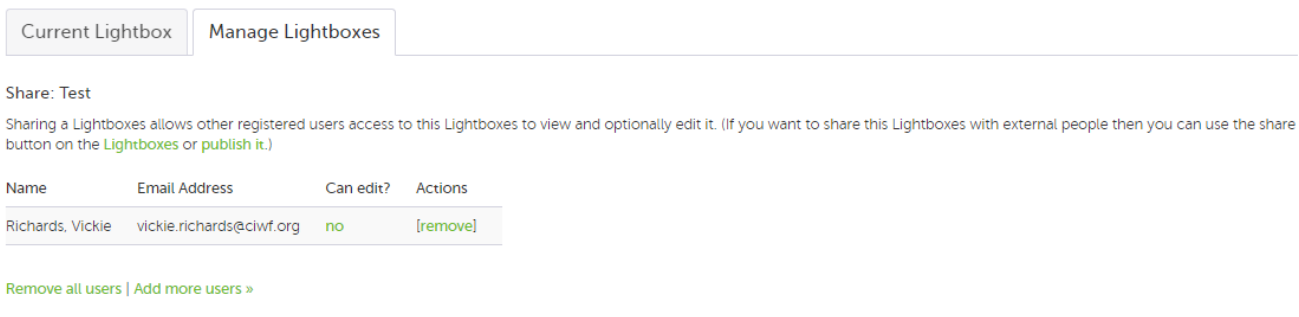

SHARE WITH EXTERNAL STAFF

To share the Lightbox with an internal member of Compassion, click Share with Users next to the lock icon. It will turn black once clicked.

A search tab for users will appear that allows you to search for the person you want to share the Lightbox with. Click on their name

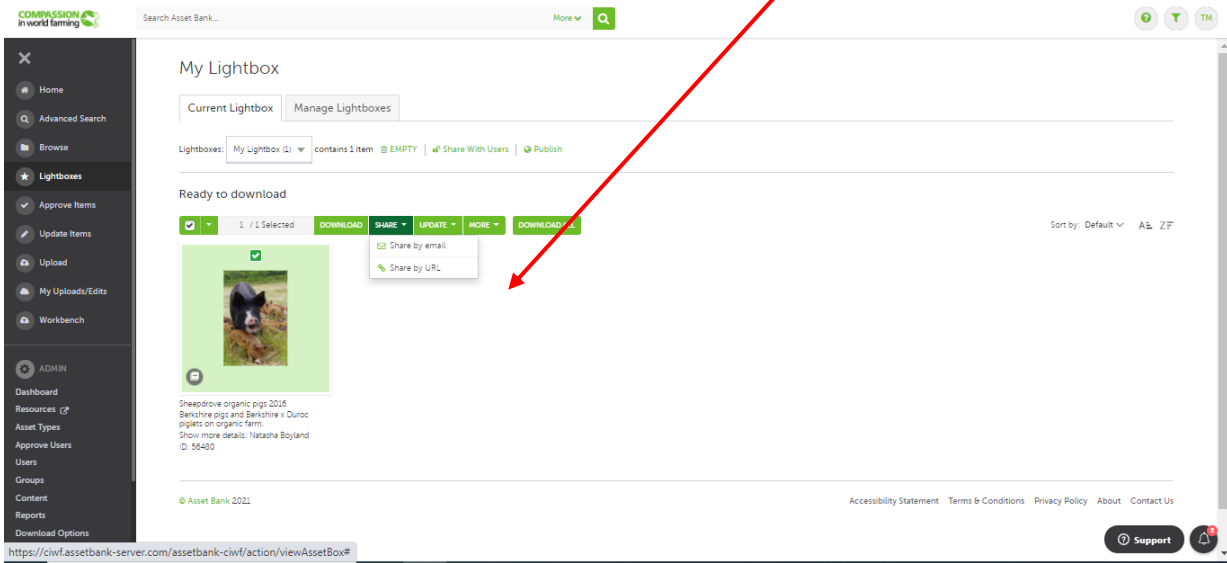

Lightboxes

If the person you want to share the Lightbox with is external staff, then you can not use this option. Instead, you need to click on the share button in the green options tab

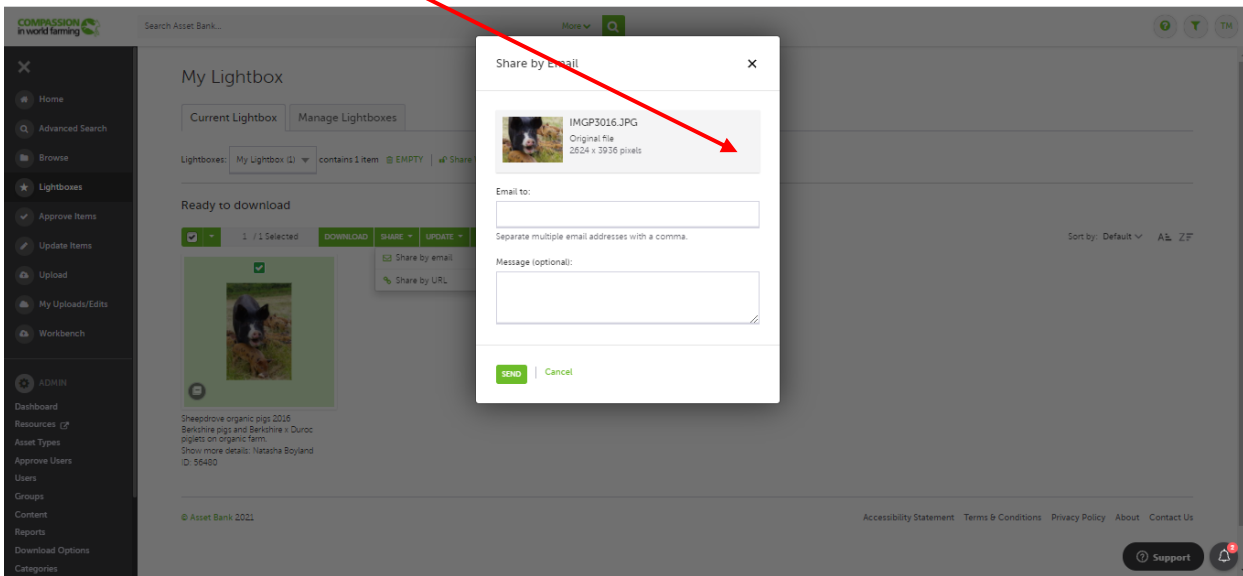

There are two options for sharing: share by email and share by URL

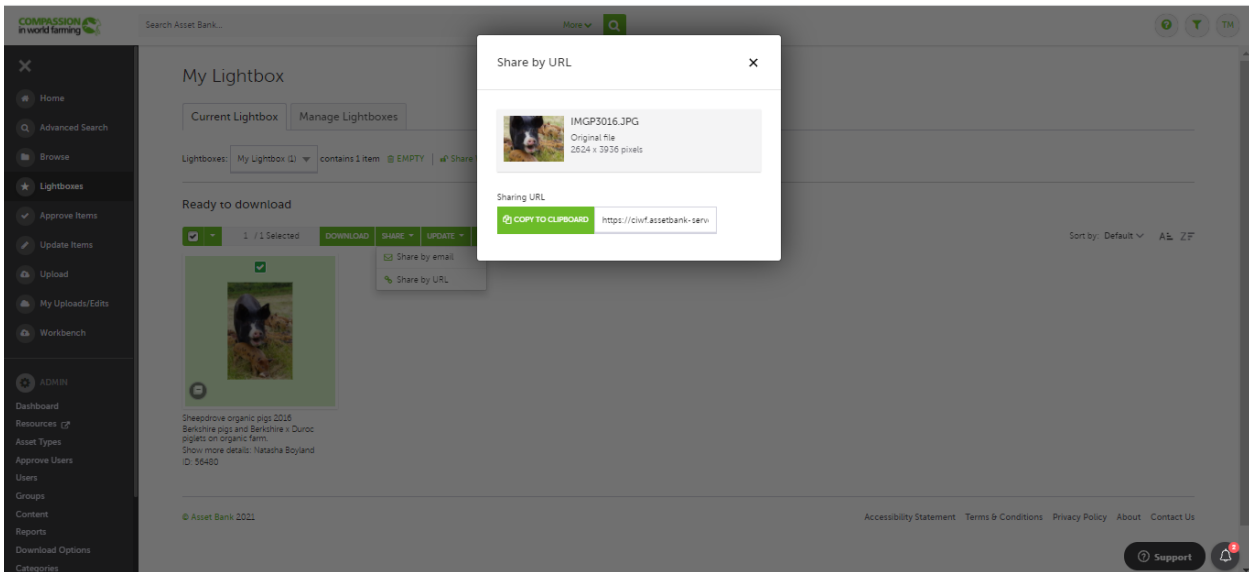

SHARE BY EMAIL

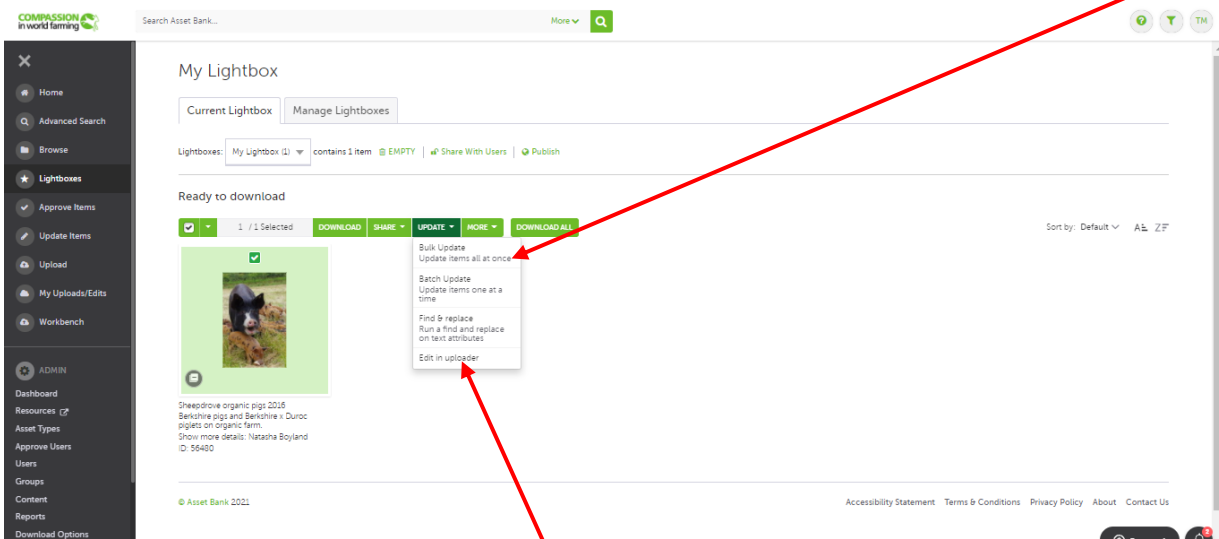

Click on Share by email

SHARE BY URL

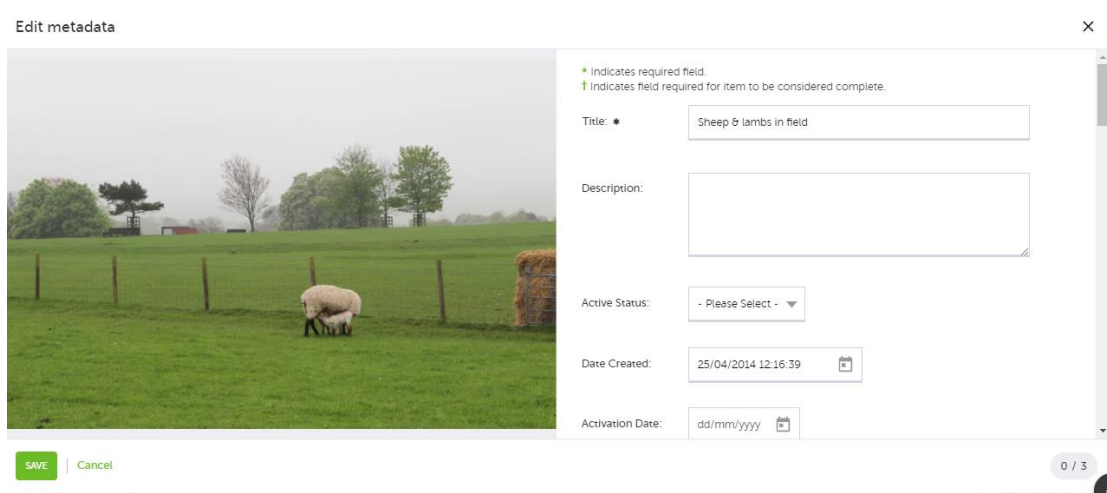

Assets can be updated (in batches) here if there is new information to add to the files. Click on update

Assets can be updated by batch or by bulk. Batching assets means that they are selected in Asset Bank by some common feature in the metadata (photographer, country) and then each file is changed individually. Bulking updates apply changes to all selected files at once – the same change is made on all the files.

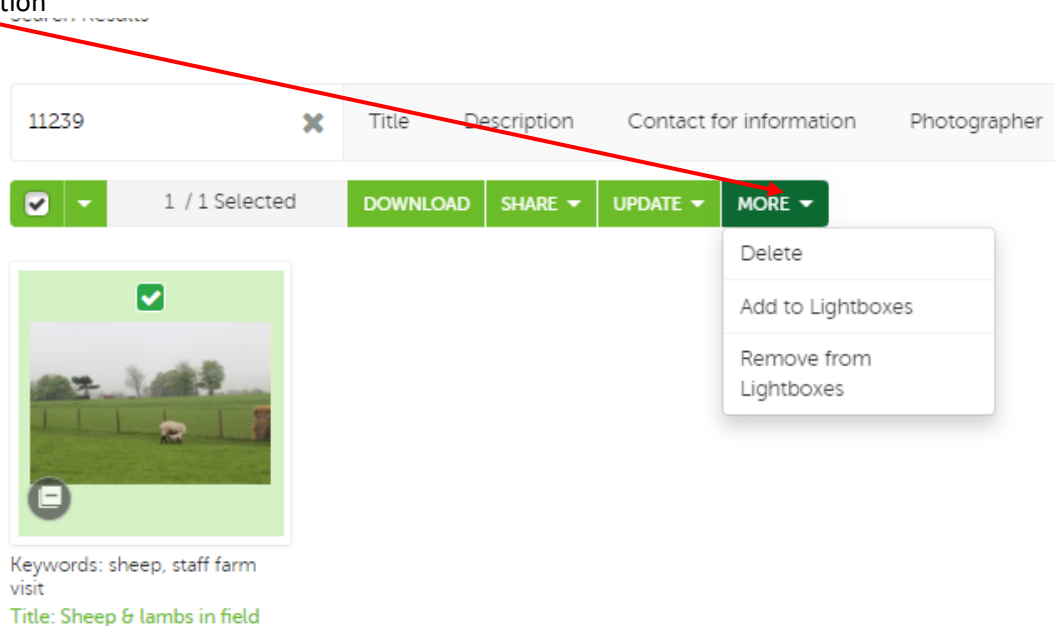

EDIT ASSETS

Assets can also be edited from here. Click on edit in uploader, select asset and a simple metadata page appears

Any edits here apply to the asset in the Lightbox **only**. The asset in Asset Bank retains the original metadata.

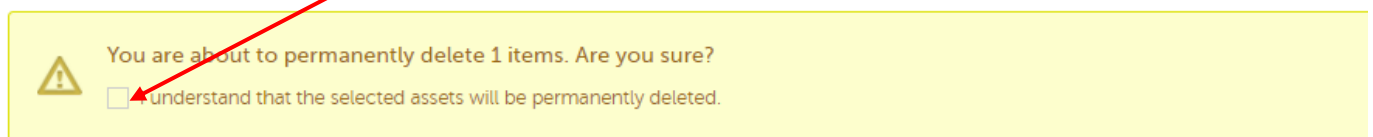

The **MORE** option

DELETE ASSET

To delete asset *(Are you sure you want to permanently delete an asset? Have you checked with others? Do you just want to remove it from the Lightbox? If so DO NOT DELETE!)*

- click delete
- Tick box next to statement

Backup the assets you're about to delete by [exporting the files and their metadata](#) | [View and refine the items being deleted](#)

Click DELETE 1 ITEMS

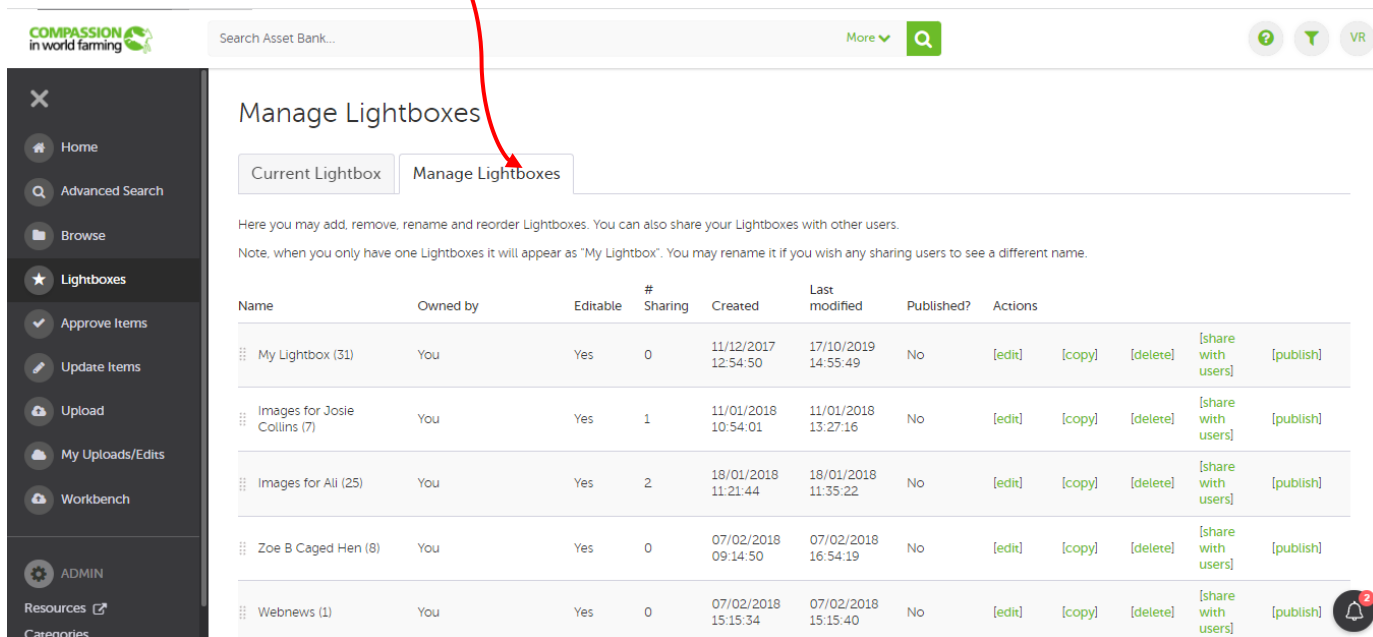

There are other options here that allow you to export and refine the metadata associated with the asset however if this is something you need to do, then it is better to simply remove the asset from your Lightbox and alter the metadata in the master copy. To do this, return to the MORE tab and click REMOVE FROM LIGHTBOX

You can also add this asset to another Lightbox from here by clicking ADD TO LIGHTBOX

MANAGE LIGHTBOXES

Click on the Manage Lightboxes tab

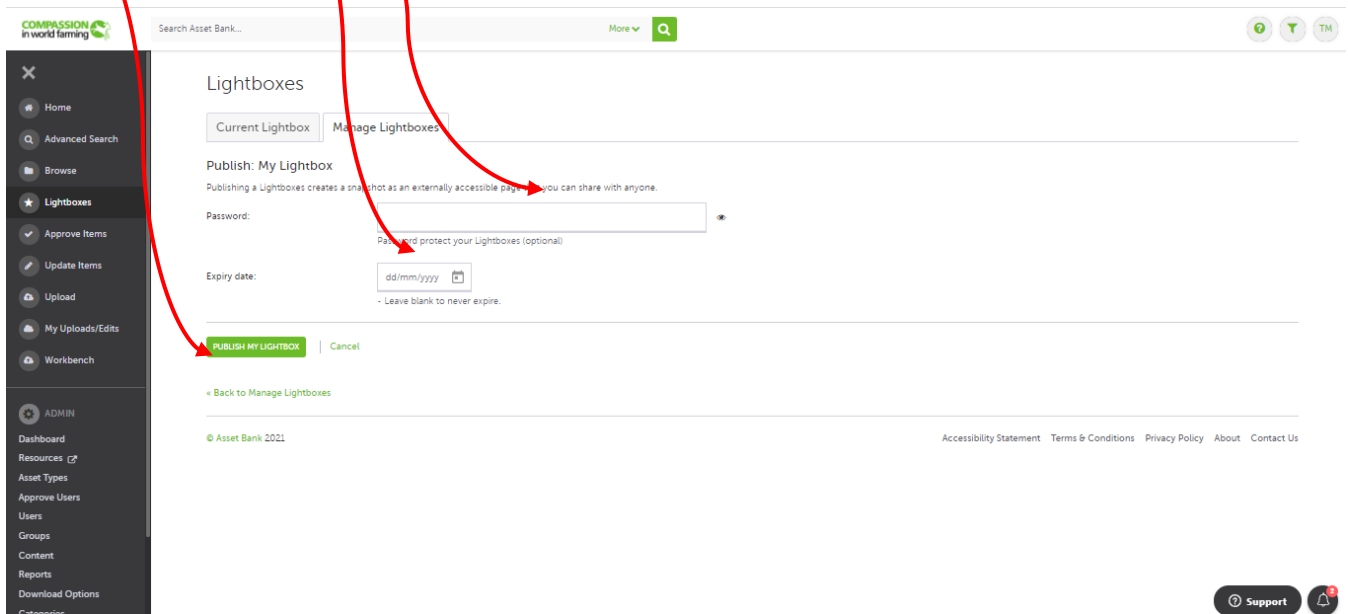

Lightboxes can be edited, deleted, shared and published from here

PUBLISH LIGHTBOX

To publish a lightbox requires a password and expiry date. Click on Publish in the manage Lightboxes tab and this window will appear

Enter the details here

Click **PUBLISH MY LIGHTBOX**

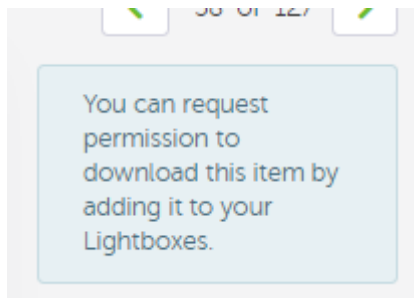

APPROVING ASSETS

REQUESTING APPROVAL

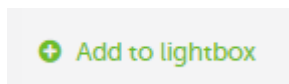

Some files require approval before downloading. Compassion has designated staff for authorizing approvals. If an asset you want to select requires approval, you will see 'approval required' next to the conditions of use

On the right-hand side of your screen, you will see a blue square box

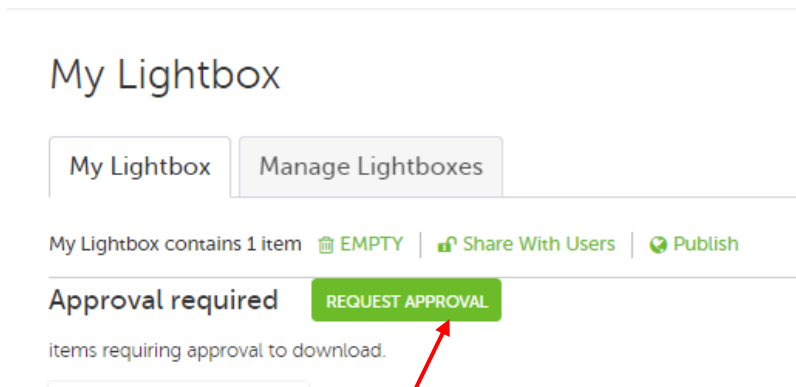

Click Add to Lightbox underneath the blue box

Go to My Lightbox at the top of your screen

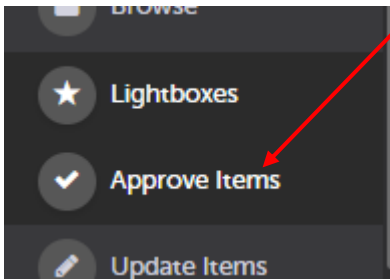

Select Lightbox that contains this asset and this page will appear

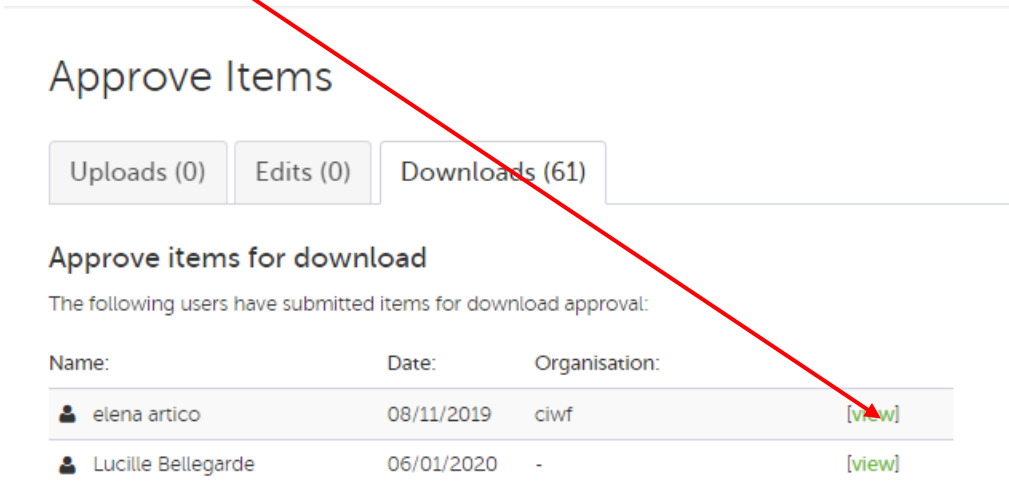

Click REQUEST APPROVAL and the request will be sent. They will either approve or not, depending on the policy relating to that asset.

APPROVE ITEMS

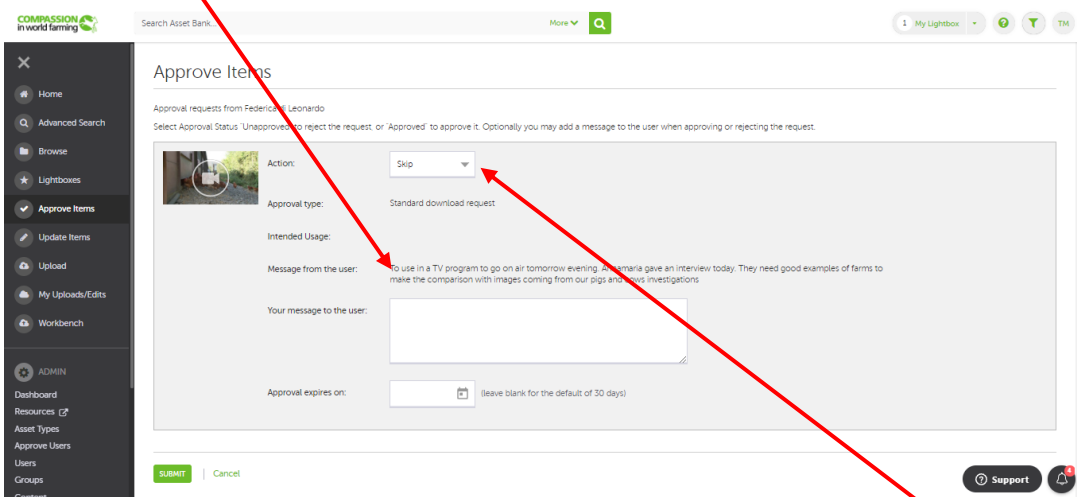

To approve an asset, select APPROVE ITEMS from the Options bar on the left-hand side of the screen

Select VIEW

This will show a screen with the requested asset and any messages from the user who has requested the approval.

Your screen will show the options to Reject, Skip, or Approve

You can add a message if you wish

Message from the user: To use in a TV program to go on air tomorrow evening. Annamaria gave an interview today. They need good examples of farms to make the comparison with images coming from our pigs and cows investigations

Your message to the user:

And set a date for the approval to expire (default is 30 days)

Approval expires on:  (leave blank for the default of 30 days)

Select SUBMIT at the end of the page

UPDATE ASSETS

SIMPLE UPDATE/EDIT

Select asset

The screenshot shows the Compassion in World Farming Asset Bank interface. A red arrow points from the text 'Select asset' to the 'UPDATE' button in the top navigation bar of the asset list. The interface includes a search bar at the top, a breadcrumb trail 'Categories > Animals > Sheep > Place Farm UK 2014 (30 items)', and a list of assets. The first asset is selected, indicated by a green checkmark in the top-left corner of its thumbnail. Below the list, there are buttons for 'DOWNLOAD', 'SHARE', 'UPDATE', and 'MORE'. The asset details for the selected item (ID 11239) are visible below the thumbnail, including the title 'Sheep & lambs in field' and keywords 'sheep, staff farm visit'.

Click on EDIT on the right-hand side

The screenshot shows the Compassion in World Farming Asset Bank interface with a large asset thumbnail displayed. A red arrow points from the text 'Click on EDIT on the right-hand side' to the 'EDIT' button in the right-hand side menu. The menu also includes 'DOWNLOAD', 'SHARE', 'Add to lightbox', 'Delete', and 'Send as e-card'. The asset details on the right show it was uploaded on 09/05/2014 13:11:18, has a file size of 6.52 MB, and dimensions of 1104 x 2456 pixels. The 'Support' button is visible at the bottom right.

This takes you to the attribute page – the page where you enter all the identifying features of the asset. You can change any of the information on this page.

BATCH UPDATE

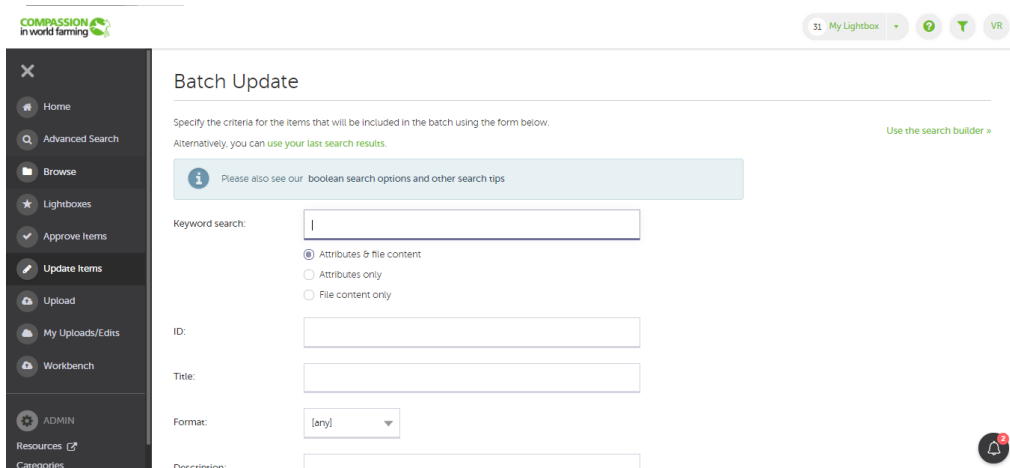

If there are several files to be updated, we can use either the BATCH or the BULK function.

BATCH update is used when several related files need to be changed individually. **BULK** update is used to make the same changes to several files.

Select Start a new batch update

We are taken to the attribute page where we can enter the specific information that will select the files we want.

The files that match the information you have entered, will appear individually and you need to check each one before saving and continuing to the next file. You can delete and skip files. This can be a long process!

Once complete, you will see this page

Batch Update Finished

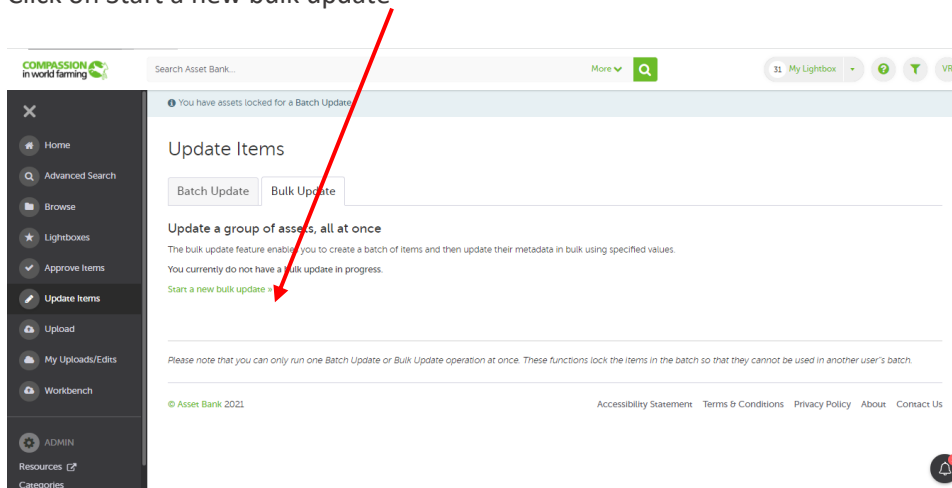

You have finished updating the items in your batch.

[Start a new batch update »](#)

Bulk updating allows you to select all the files and apply changes to them all at once.

BULK UPDATE

Click on Start a new bulk update

Upload session in progress. Note: any changes will be lost if you log out.

Bulk Update: Create Batch Using Search

Specify the criteria for the items that will be included in the batch using the form below.

Please also see our [boolean search options and other search tips](#)

Keyword search:

Attributes & file content
 Attributes only
 File content only

Enter keyword or any other piece of metadata you have, to identify the assets you want

Select View and Select items in batch for update >>

Select Run an update on the selected items in this batch >>

Enter new information on page

Bulk Update: Run an Update

There are 15 items for update in your batch. Please enter the metadata below for the fields that you want to update in bulk.

Enter Metadata

For each attribute that you want to be updated in bulk, choose to either replace or append the current value, then fill in the new value in the right-hand column. Attributes will not be updated unless the corresponding drop-down is selected.

Please note that if replace is selected and the attribute has a blank field value in the right-hand column, then the attribute value will be set to empty on all items in the batch.

Title:	<input type="text" value="- Skip -"/>	<input type="text"/>
	<input type="text" value="- No delimiter -"/>	
Date Taken:	<input type="text" value="- Skip -"/>	<input type="text" value="dd/mm/yyyy"/> 
Categories	<input type="text"/>	<input type="text"/>

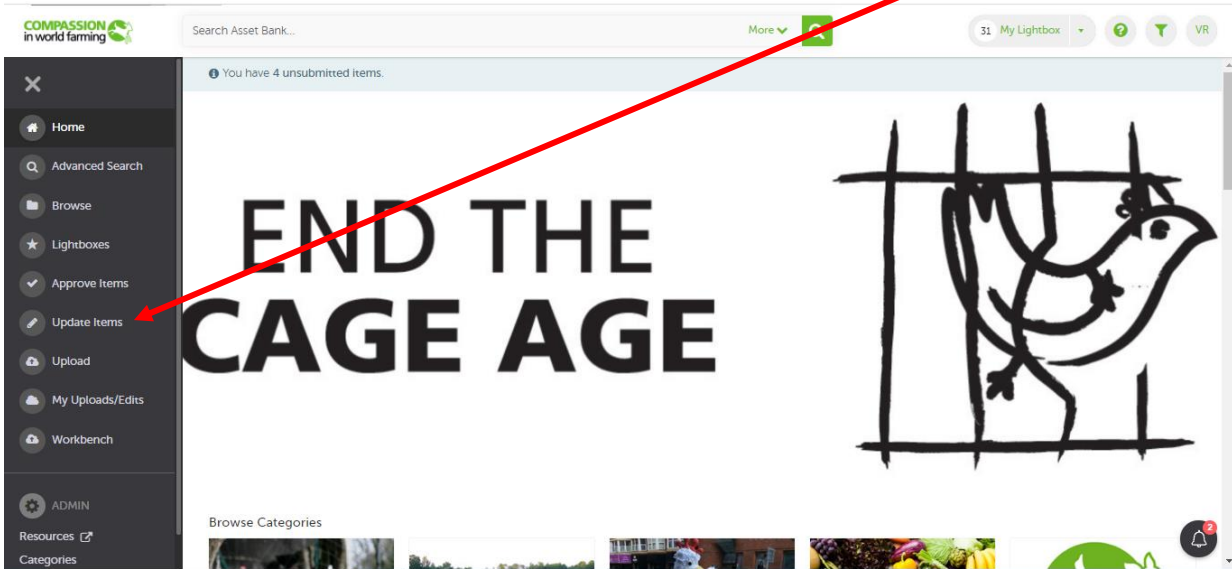

At the bottom of the page, click 'START UPDATE'

Run changes and click FINISH when prompted. It is important to click FINISH as no one else can work on these assets if they are still recorded as part of a batch.

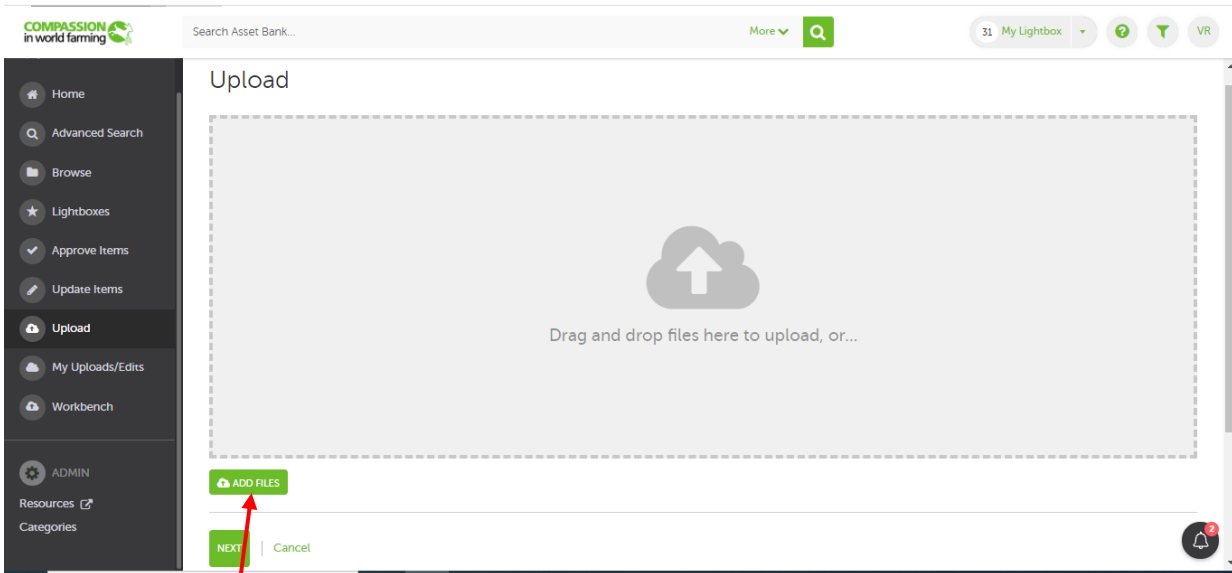

UPLOADING ASSETS

UPLOAD AN ASSET

From the Home page, select 'Upload' on the grey panel on the left-hand side of the screen.

This takes you to the 'Upload' page

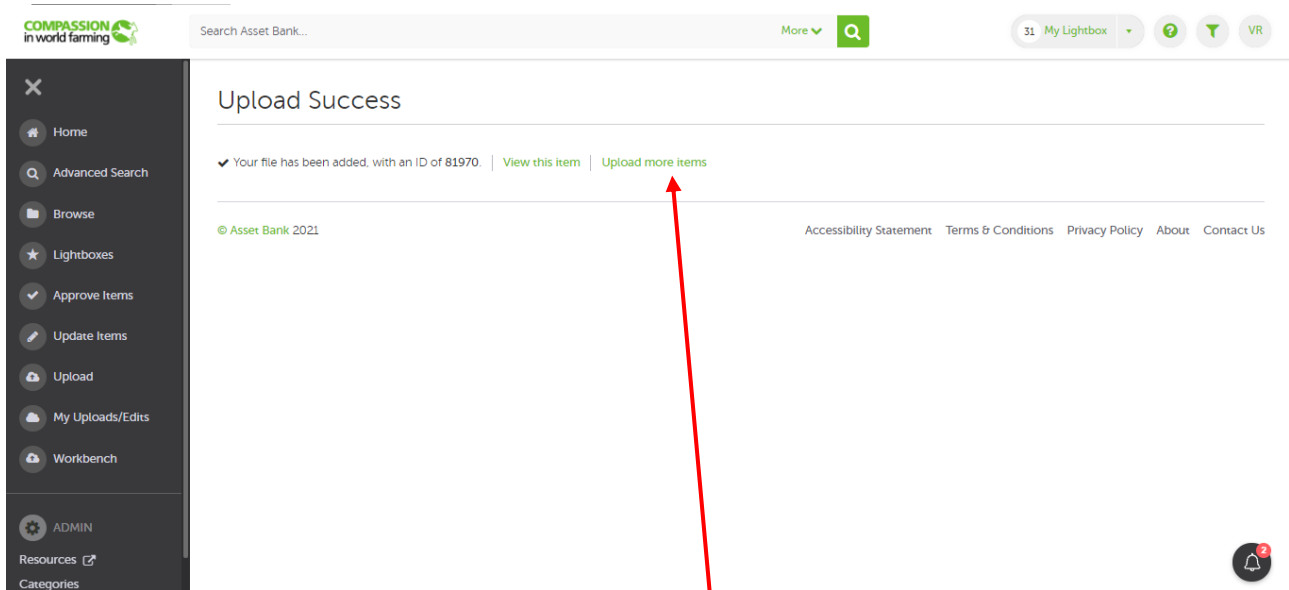

Click on ADD FILES

If you want to add more assets, click on **'Upload more items'**

Notes:

The drop down options for many sections can help you find terms, particularly the **KEYWORD CHOOSER...** **MANAGE MASTER LIST...** buttons alongside the Keywords box.

This information can be changed at a later stage.

SHORTCUTS

Search

Finding an asset by type 'pigs', "organic'

1. Enter search term in search bar

2. Select asset by clicking on it
3. Click **download** on right hand side of page
4. Click **download original**

Finding an asset when I don't know its name but know some information (name of farm, animal type, person) 'Worthy Farm'

1. Enter search term in search bar

2. Select asset by clicking on it
3. Click **download** on right hand side of page
4. Click **download original**

Finding an asset when I know the ID '70035'

1. Enter search term in search bar '70035'

2. Select asset by clicking on it
3. Click **download** on right hand side of page
4. Click **download original**

Downloading assets

Cropping image before downloading

1. Select **download**
2. Select **Advanced download**
3. Select **crop area**

A cross will appear +

4. Position cross at the top left-hand corner of the area you want to crop and slide it over the image, covering all of the parts you want in your image
5. Click on **CROP & CLOSE**

Setting up a Lightbox

1. Click MY LIGHTBOX in filter bar at top of screen on right-hand side

2. Enter name of new Lightbox in the Create new search bar and Click **ADD**

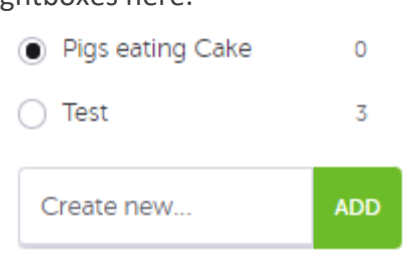

3. Click on green triangle to the right of MY LIGHTBOX in filter bar at top of screen on right-hand side

4. A dropdown menu appears with new Lightbox. Click on circle next to Lightbox.

You should see a black dot in the circle next to the new Lightbox. Any assets you add to Lightbox will now go to this Lightbox. To change the Lightbox you add assets to, just click on the circle next to any of the other Lightboxes here.

Adding an asset to a Lightbox

5. Select files from search
6. Click  **Add to lightbox**
7. Lightbox should appear in MY LIGHTBOX with number of files in it in brackets

Asset has now been added to Lightbox

To change the Lightbox, just click on the circle next to any of the other Lightboxes.

FAQs

Example: I search for an image, use correct terms, and still get loads of text-based documents (reports, magazine covers) in my results

Solution: Select Attributes only in the MORE tab

Search Asset Bank... More  

Click on MORE

Select: Attributes only

Attributes & file content Attributes only File content only

“PIGLETS IN FARROWING CRATE

Dead or dying piglet in farrowing crate. The crates are designed to reduce the risk of crushing piglets but mortalities can still be high. This may be due to over large litters and weaker piglets. Crated sows commonly eat less and produce less milk so there is a higher risk that piglets may not get enough to eat. Notice severely tail docked piglets in farrowing crate suggesting that it may be likely to be reared in an inadequately enriched environment with a high risk of tail biting.”

Terms to use

Broilers

Poor	Improving	Good
farms, selective breed, weak legs, infections, antibiotic use	Less intensive farming, slower growing breeds, good feed, more space – still indoors	Outdoors, areas to move about in, slow growing breeds, no antibiotics, clean air, food to peck,
